MEETING NOTICE

THERE WILL BE A MEETING OF THE LITTLE CALUMET RIVER BASIN DEVELOPMENT COMMISSION AT 6:00 P.M. TUESDAY, DECEMBER 7, 1999 AT THE COMMISSION OFFICE 6100 SOUTHPORT ROAD PORTAGE, IN

WORK STUDY SESSION - 5:00 P.M.

AGENDA

1. Call to Order by Chairman Emerson Delaney
2. Pledge of Allegiance
3. Recognition of Visitors and Guests
4. Approval of Minutes of November 10, 1999
5. Chairman's Report
   - Appointment of Nominating Committee for Year 2000 officers
   - Comments on dedication held on 11/12 at Lake Etta
6. Executive Director's Report
7. Standing Committees
   A. Land Acquisition/Management Committee – Chuck Agnew, Chairman
      • Appraisals, offers, acquisitions, recommended actions
      • COE Real Estate meeting held on 11/23/99
      • Aggressive Corps schedule
   
   B. Project Engineering Committee – Bob Huffman, Chairman
      • Recommended actions
      • Quarterly Technical Review meeting was held with the COE on 11/9
      • Pre-design Conference held for Stage VII (Northcote to Columbia) on 11/23
      • Other issues
   
   C. Legislative Committee – Arlene Colvin, Chairperson
      • Status of short session fund corrections
      • Other issues
   
   D. Recreational Development Committee – George Carlson, Chairman
      • Other issues
   
   E. Marina Development Committee – Bill Tanke, Chairman
      • Other issues
   
   F. Finance/Policy Committee – Arlene Colvin, Chairperson
      • Financial status report
      • Approval of claims for November 1999
      • Finance Committee meeting held December 1st
      • Other issues
   
   G. Minority Contracting Committee – Marion Williams, Chairman
      • Minority participation for East Reach Remediation area

8. Other Business

9. Statements to the Board from the Floor

10. Set date for next meeting
MINUTES OF THE LITTLE CALUMET RIVER BASIN DEVELOPMENT COMMISSION
HELD AT 6:00 P.M. WEDNESDAY, NOVEMBER 10, 1999
AT THE COMMISSION OFFICE
6100 SOUTHPORT ROAD
PORTAGE, INDIANA

In Chairman Emerson Delaney’s absence, Vice Chairman Bill Tanke called the meeting to order at 6:10 p.m. Eight (8) Commissioners were present. Pledge of Allegiance was recited. Quorum was declared and guests were recognized.

Development Commissioners:                           Visitors:
Charles Agnew                                        Herb Read – Izaak Walton League
Arlene Colvin                                        Denis Buksa - Munster IN
George Carlson                                        Kerry Keith – SEH, Inc.
Steve Davis                                          Dale Gick - IDNR
William Tanke                                        Jomary Crary - IDNR
Bob Huffman                                          Staff:
Curtis Vosti                                         Dan Gardner
                                                     Sandy Mordus
                                                     Lou Casale
                                                     Jim Pokrajac
                                                     Judy Vamos

Chuck Agnew made a motion to approve the minutes of the October 7th meeting; motion seconded by Arlene Colvin; motion passed unanimously.

Chairman’s Report – Vice Chairman Bill Tanke discussed the trip to Richmond VA. that the Commission went to view their flood control project. They have constructed massive floodwalls and closure structures to prevent flooding from the James River. The city sits low and they receive water from the mountains coming down so they have constructed a flood control project similar to ours. Their project was authorized in 1986 and completed in 1994 acquiring a total of 139 properties (versus 1200 properties the Commission needs to acquire). They have incorporated a river walk along a canal which will spur economic development in the area. They made a van and about 5-6 people available to us for the entire day for discussion and touring. Commissioner George Carlson thought their presentation of the project was outstanding and felt that he learned a lot. Mr. Pokrajac added that they are sending us a set of their O&M manuals they received from the COE. Mr. Gardner added that he will be sending them a thank you letter for the time they took with us.
Executive Director’s Report – Executive Director Dan Gardner reported that he has been communicating with the Congressman’s Office, working with Mark Lopez, toward a dedication to be held on Friday, November 12th. The event will mark the halfway point of construction funding. The request to hold the dedication came from the Congressman and the letter of invite will go out under his signature. All are invited and it will be held at Lake Etta in their community building.

Subsequent to the signing with Lake Erie Land Company, Mr. Gardner went to Indianapolis, as well as LEL officials, to meet with IDNR and IDEM chief policy people in regards to LEL’s permit process. Ongoing discussion will take place with them.

Mr. Gardner referred to the draft Local Cooperation Agreement and Amendment to it that was given to all Board members for review. This agreement is for the Burr Street Betterment levee. The COE needs to have a separate LCA because it is a betterment cost. Attorney Casale added that he and the COE attorney have made amendments and modifications to the agreement and addendum and he feels it is acceptable in the form presented to the Board members this evening. Curt Vosti made a motion to approve the agreement as presented; motion seconded by Arlene Colvin; motion passed unanimously. Mr. Casale stated that it will now be sent to the Washington COE office for their approval. If they approve, signatures will follow.

Land Acquisition Committee – Committee Chairman Chuck Agnew made a motion ratifying the contract with Kelly Hall for $4,000 to perform the levee mowing; motion seconded by Arlene Colvin; motion passed unanimously.

Mr. Agnew further reported that he and Mr. Gardner met with Don Ewoldt of LEL regarding discussion on the handicapped park proposed for Lake Station. A discussion was also held with Lake County Park Dept. for their possible management of the park once it is developed.

Mr. Agnew talked on the COE designating the year 2000 as the “Year of the Little Cal”. Pressure is on to make sure we acquire all the lands necessary to keep up with the aggressive Federal schedule of construction. Over $10 million in contracts must be awarded in the next several years and land acquisition is crucial to the plan.

Project Engineering Committee – Committee Chairman Bob Huffman gave the engineering report. He stated that Jim Pokrajac had attended a meeting in Chicago on Oct. 29th to discuss different formliner options which could be incorporated into the west reach plans where there is high visability. Mr. Huffman also reported that construction has started in the east reach remediation area. All clearing and grubbing and inspection trench is completed; construction will stop when cold weather comes and project construction completion is September 2000. Mr. Huffman also reported that a field review and discussion of Stage VII (Northcote to Columbia) will take place on November 23rd with the COE and Earth Tech Environmental (COE’s engineering firm). A pre-bid meeting was held on Stage IV Phase 1 North on October 15th. A meeting was also held with Woodmar Country Club and the COE on November 4th to discuss how the future levee construction of the golf course will impact the golf season. Future meetings will be held. A technical review meeting was held in Chicago on 11/9.
LCRBDC Minutes
November 10, 1999
Page 3

Legislative Committee – Committee Chairperson Arlene Colvin gave the report. She referred to the newspaper article indicating the Commission being earmarked for $1.5 million from the Special Build IN capital fund. Although the Board was happy to receive the $1.5 million, it expressed concern that it still would not be sufficient to keep to the Federal schedule. It is hoped that the Commission can still secure at least an additional $1.5 million in the short session. We have received the budget forms to fill out in order to be able to draw down the money. Staff will complete those forms and return them. Mr. Gardner then referred to the COE letter requesting $1 million to be placed in escrow estimated to be incurred through the end of the Federal government’s fiscal year ending on September 30, 2000. Mr. Vosti questioned the federal funds needed versus non-federal funds. Mr. Gardner informed him that the figures do not include land acquisition costs or any utility relocation costs.

Recreational Development Committee – Committee Chairman George Carlson stated that Mr. Agnew had already covered the proposed handicapped park in his report. The Board members expressed satisfaction that it would be moving along and that LEL has consented to make it happen.

Mr. Carlson referred to the $800,000 grant money that Hammond is receiving for completion of the trail system linking Hammond and Highland. Staff has sent a letter to the COE expressing the Board’s desire to move up our portion of the project to accommodate the bridge link but the COE has indicated they need more time yet to make an evaluation.

Marina Committee – Committee Chairperson Bill Tanke referred to the news article in the agenda packet in regards to the Ogden Dunes lawsuit. It appears that a proposed agreement has been reached that would provide some beach restoration to them. Attorney Casale added that we were originally named in the lawsuit (because of the breakwater and marina construction) and since we were dismissed from the lawsuit, he has not been party to any direct contact or meetings.

Mr. Tanke also indicated that the attorney has written a letter to the City of Portage asking for year end figures of the Portage Public Marina.

Finance Committee – Committee Chairperson Arlene Colvin made a motion to accept the financial report and approve the October claims totaling $84,720.38; motion seconded by George Carlson; motion passed unanimously.

Ms. Colvin also reported that the Finance Committee met on 10/13 and proceeded to make the following motions. Ms. Colvin made a motion to accept the new rate schedule of R. W. Armstrong Company to bring them in line with other engineering professionals and also to increase the hourly rate for Attorney Casale to $80/hour, which is still substantially lower than most legal firms; motion was seconded by George Carlson; motion passed unanimously.
Ms. Colvin then made a motion allowing additional hours, outside of regular business hours, to be charged by staff Sandy Mordus for the sole purpose of documentation of credit for the Corps of Engineers; motion seconded by George Carlson; motion passed unanimously.

**Minority Contracting Committee** – In Committee Chairman Marion Williams’ absence, Jim Pokrajac reported that monthly minority reports by Dyer Construction who is doing the East Reach Remediation area, will be forthcoming. Hopefully, we will have received them by our December meeting.

**Other Business** – Mr. Tanke read a thank you note from Judy Vamos, who was sent flowers on the recent passing of her mother.

Commissioner Bob Huffman inquired about the Cady Marsh ditch project. Mr. Gardner informed him that he understands that the COE has completed their study and has forwarded it to the town of Griffith. The town will have to act as the local sponsor if they want the project to move forward. It is estimated to be about a $17 million project and about 25% of that cost would be the local sponsor’s. The town is interested but no formal commitment has been made.

**Statements to the Board** – Herb Read stated that he had attended the meeting in Ogden Dunes relative to the newspaper article. He sees the situation as the remedy to the shoreline restoration. Now is the chance for them to get their beach. Although some residents are opposed because they do not want a public parking lot near the Lakeshore, this compromise is the best that is being offered. The Congressman has been very active in these negotiations in trying to secure beach restoration and public access.

There being no further business, the next regular Commission meeting was scheduled for **6:00 p.m. Tuesday, December 7, 1999. Please note that this is a change from our regular first Thursday of the month meetings, which we try to schedule.**

Little Calumet Flood Control project reaches halfway mark

The work is scheduled for completion in 2008.

BY LAURI HARVEY
Times Staff Writer

GARY – Local, state and federal officials gathered Friday morning at Lake Etta Park in Gary to celebrate the completion of half of the Little Calumet River Flood Control and Recreation Project.

“We are at the halfway point, and it will be complete, I think, in all of our lifetimes,” said U.S. Rep. Pete Visclosky, D-Ind. “Clearly, there are important things that are taking place here.”

The Little Calumet River basin historically has been affected by flooding. This project is intended to help prevent flood damage to more than 9,500 homes in Gary, Griffith, Hammond, Highland and Munster. In November 1990, flooding reached disaster level in Hammond, Highland and Munster with an estimated $35 million in flood damages and one death. President Clinton declared the flood zone a National Disaster Area.

“People over a three-decade period of time have cooperated with one another for a region-spanning effort to improve the quality of life for everyone, regardless of where they live,” Visclosky said.

The project covers 22 miles along the river from the Illinois state line east and encompasses the construction of 22 miles of levees and flood walls, upgrades to pumping plants, modifications of bridges and channels and the establishment of a flood warning system. When the project is complete in 2008, it will include 17 miles of new hiking trails along the river and the preservation of more than 750 acres of wetlands. Construction began in 1990 after nearly 20 years of planning.

Lt. Col. Peter Rowan of the U.S. Army Corps of Engineers said the project is expected to be completed by 2008. Rowan said the work is estimated to save $11.5 million annually in flood damage.

Indiana Rep. Chet Dobis, D-Merrillville, said he is looking forward to the completion of the project.

“In the basements that aren’t getting flooded anymore, little by little, the residents are beginning to feel the benefits of this project,” Dobis said.

WORK STUDY SESSION
ENGINEERING COMMITTEE
December 7, 1999
Bob Huffman, Committee Chairman

1. Apparent low bidder for IV-1 (North) Colfax to Burr – North of N.S. RR. is Dillon Contractors, Inc.
   - Bid - $2,708,720
   - Federal Government estimate - $3,403,125

2. Griffith levee/Kortenhoven (Cline to E.J. & E. RR) is now completed except for 70' area West of E.J. & E. R/W – We will tie this in as part of our betterment levee-Phase 1 project.

3. Tech review meeting was held in Chicago on November 9 (refer to Engineering report for details).

4. A field review and FDM5 discussion regarding Stave VII (Northcote to Columbia), both sides of river, was held on November 23 (refer to hand out).
December 3, 1999

Lt. Col. Peter Rowan
District Engineer
U.S. Army Corps of Engineers
111 N. Canal Street
Chicago, Illinois 60606-7206

Dear Colonel:

This letter is to serve as a statement of financial capability for the Little Calumet River Basin Development Commission to perform the non-federal commitments for the LCA regarding the Burr Street Betterment levee. The Development Commission has submitted a financial capability statement regarding the overall flood control/recreation project on the Little Calumet River with the Burr Street Betterment levee being requested by the Development Commission and the city of Gary to provide comparable structural protection in the Burr Street reach of the project area. The Development Commission has received continuous support from the Indiana General Assembly in 13 consecutive State biennial budgets amounting to over $25,968,000. The Development Commission has recently received an allocation of $1.5 million from last year’s special Build Indiana Funds and we anticipate requesting additional monies in this session of the Indiana General Assembly to provide for sufficient non-federal fund availability.

We will work with the Chicago District Corps of Engineers to make funds available as needed to meet the federal construction requirements. If you have any additional questions or need additional information, please contact me.

Sincerely,

Dan Gardner
Executive Director

/sjm
cc: John Sirles
     Imad Samara
     Lou Casale, LCRBDC attorney
Mr. Imad Samara  
U.S. Army Corps of Engineers  
111 N. Canal Street  
Chicago, Illinois 60606-7206

Dear Imad:

This letter is to confirm the Little Calumet River Basin Development Commission has reviewed and concurred with the recommendations contained within the Final Burr Street Betterment Levee Design Memorandum dated December 1997. The Development Commission is prepared to meet the non-federal requirements contained in the document. In that regard, we have approved the Amendment #2 and the LCA for Burr Street and they have been forwarded to you for Washington approval. I trust this meets your needs to move forward toward implementing the Burr Street levee. Please call if you need additional information.

Sincerely,

Dan Gardner  
Executive Director

/sjm
On the Trail in Northwest Indiana

The Northwestern Indiana Regional Planning Commission, in cooperation with John Davies of the Northwest Indiana Forum, is developing a year long series of television programs called *On the Trail in Northwest Indiana*. The series highlights significant public projects in Northwest Indiana and NIRPC’s role in their development.

December’s program features Dan Gardner, Little Calumet River Basin Commission’s Executive Director, and Lake Co. Parks and Recreation Superintendent Bob Nickovich discussing plans for recreation trail development along the Little Calumet River linking six parks along the corridor. Featured is Lake Etta Park in Gary.

The series has previously featured lakefront marina development in Michigan City, trail development in Valparaiso, development of a youth golf course in Hammond and plans for the redevelopment of the lakeshore near Buffington Harbor in Gary.

*On the Trail in Northwest Indiana* will be aired on the following Northwest Indiana cable television stations between December 8th and 14th at these times (subject to change):

**Gary - Channel 21**
Saturday and Sunday three times daily

**Portage - Channel 4**
Monday at 7:30 p.m.

**Hammond and East Chicago - Channel 16**
Wednesday at 9:00 p.m.

**Valparaiso and Chesterton - Channel 43**
Monday and Tuesday at 9:45 p.m. and Wednesday, Thursday and Friday at 3:00 p.m.

**Merrillville - Channel 3**
Wednesday at 5:45 p.m., 6:45 p.m., 7:45 p.m. and 9:45 p.m.

**Michigan City - Channel 3**
Wednesday at 5:45 p.m., 6:45 p.m., 7:45 p.m. and 9:45 p.m.

*On the Trail in Northwest Indiana* is also broadcast on PBS (WYIN) Channel 56 on the third and fourth Sunday of the month at 7:00 a.m.
RECREATION REPORT
Tuesday December 7, 1999

GENERAL STATEMENT:
Currently, the joint recreation venture with the Army Corps is completed; 85% of the completed east reach levees have stoned trails completed; the remainder of east reach trails should be completed by the fall of 2001.

RECREATION - PHASE 1. (This contract includes recreational facilities for Lake Etta, Gleason Park, Stage III (trails), and the OxBow area in Hammond.

A. OXBOW (Hammond)
   1. October 28th, 1998 was the date that this facility was turned over to the City of Hammond.

B. GLEASON PARK (Gary Parks & Recreation)
   1. October 28th, 1998 was the date this facility was turned over to the Gary Parks and Recreation Department.

C. LAKE ETTA (Lake County Parks)
   1. October 27th, 1998 was the date that this facility was turned over to the Lake County Parks Department.

D. CHASE STREET TRAIL (City of Gary)
   1. October 27th, 1998 was the date that this facility was turned over to the City of Gary.

RECREATION – GENERAL
A. Lake Station – Handicapped Accessible Park (Refer to Land Management Report)
   1. It has been discussed with the Lake Erie Land Company the possibility of using them to develop this park in return for considerations of land use for wetland banking. (Agreement is ongoing and in process of review)
   2. Once the LEL contract has been finalized, a coordination meeting with the Recreation and Land Management Committees will review the money available and develop a scope of work.

B. We received a letter from the COE on April 12 regarding recreational trail re-alignment from the existing levee north of IUN and west of Broadway indicating that they will forward real estate information to us.
   1. We received the signed easement agreement from the Gary Public Works Dept. on December 2nd, 1999.
An trail around the Gas City Truck Stop East of Grant
the COE and City of Gary.
work, along with other recreational work, in the late spring
press release on July 13th announcing the 1999 Transportation
which includes $800,000 to complete the Highland/Wicker Park/Erie
systems.
The Town of Highland, Hammond, and North Township have requested we pull
some of the recreational portions of our V-3 (Woodmar Country Club), and V-
W (Wicker Park) contracts to allow their trail systems to be contiguous.
We submitted a letter to the COE on August 17th, 1999 and again on September
16th and have received no response to date.
We received a call from Dennis Cobb in mid-November that due to the local
scheduling and our scheduling, we may not gain that much time.
- A meeting is scheduled for December 7th, 1999, to review the feasibility of the
local request.

E. We received a letter from the E.J. & E. RR. dated September 1st, 1999, and forwarded it to the
Commission attorney for legal review on September 8th, 1999, regarding their allowing us an at-
grade crossing for the Betterment Levee Recreation Trail.
1. Our insurance appears to cover the liability requirements requested by the
railroad. An agreement needs to be put in place that would allow us the option to
do this work as an addendum to the betterment levee – Phase I project.
- Prior to an agreement, we will need engineering information from the Corps &
the E.J. & E. to attach.

WORK STUDY SESSION
ENGINEERING COMMITTEE
December 7, 1999
Bob Huffman, Committee Chairman

1. Apparent low bidder for IV-1 (North) Colfax to Burr – North of N.S. RR. is Dillon Contractors, Inc.
   - Bid - $2,708,720
   - Federal Government estimate - $3,403,125

2. Griffith levee/Kortenhoven (Cline to E.J. & E. RR) is completed except for 70' area West of E.J. & E. R/W – We will tie this in as part of our betterment levee-Phase 1 project.

3. Tech review meeting was held in Chicago on November 9 (refer to Engineering report for details).

4. A field review and FDM5 discussion regarding Stage VII (Northcote to Columbia), both sides of river, was held on November 23 (refer to hand out).
1.) There are no increased offers

There is one (1) condemnation:
DC 377 Lots 20 & 25 Block 8 Liberty Farmettes Subdivision.

2.) The Halfway Point Dedication was held at Lake Etta Park on Friday, 12 November 1999. Congressman Peter Visclosky was main speaker. Other dignitaries included:
    Colonel Peter Rowan of Army Corps
    Governor Frank O'Bannon's representative Sherilyn Freeland McCrady
    Gary Mayor Scott King
    State Representative Chet Dobis
    and of course, our own Dan Gardner, Executive Director of the LCRBDC.

3.) Discussion and may need a motion (?):
    LCRBCD has donated approximately 50 acres to the Committee to Improve Emerson (CIE) to provide free food and farming opportunities to the Gary community. The program has not been successful. Community residents did not take advantage of the project. Should LCRBDC renew the donation to CIE or bid out the 50 acres to local farmers next year? If yes LCRBDC would be farming approximately 140 acres outside the levees on land south of the south levee between Chase & Grant Streets.
    * Decision whether to donate to CIE or bid land to farmers? Need a motion?

4.) Discussion on the 3120 Gerry Street property:
    This property (the Harris house) needs a new roof. This repair is necessary. The LCRBDC is also considering relocating the garage. The garage is directly in the ditch line and should be demolished or relocated to the rear part of the property. The following are figures necessary to make a decision as to whether demolishing the garage or moving it is a good investment:
Expenditures:
Purchase price of property $39,000 (closed 10-95
Repairs over the last four years $ 3,000 (11/95 to 11/99
New roof (approximately) $ 2,700 (estimate)
Total $44,000

Income:
Rent for 48 months from 11/95 to 11/99 at $350 monthly
Total $16,800

To move or build a new garage would cost approximately $4,800
If the garage is not built/moved rent should be lowered $50 @ month to $300 monthly

Remarks:
1.) Tenants are dependable and desire to buy the house. It would be difficult to rent the house if they moved.
2.) If tenants moved and the house was vacant for a week thieves would scavenge the house for sellable materials. It would be a total loss to the LCRBDC.

* Decision to demolish the garage, build, or move it? Need motion?

5.) The Corps continues its aggressive acquisition schedule for all project lands to be acquired by March 2000. Corps has approximately $10 million dollars that must be spent in their fiscal year which ends September 2000 and is working to obtain another for the next fiscal year. LCRBDC will have problems keeping up with this schedule. Dan and Lou have requested a meeting with Deputy Colonel John Sirles to discuss the funding/budget issues and discuss the issues of state funding.
NON-PROJECT LAND MANAGEMENT

A. Handicapped-Accessible Park
   1. The handicapped-accessible park is located on the 42 acres east of Clay and north of Burns Ditch.
   2. An agreement to delete the park from the Lake Erie Land option is currently under review by them. Construction could start as soon as items are agreed on.

B. Chase Street to Grant Street land management issues
   1. We received a letter from the COE on March 17, 1999 requesting local review for drainage remediation.
      • Engineering review for drainage remediation plan from COE is ongoing (See Stage III of Engineering Report)
   2. Potential exists for drainage improvements to this area with a joint venture between LEL, City of Gary, GSD, COE and LCRBDC.
      • This will be coordinated with all above parties after our preliminary field review with the Corps on December 10th, 1999.

PROJECT RELATED LAND MANAGEMENT

A. O&M (Project manual review/accepting completed segments)
   1. The COE has requested since August 28, 1997 that we complete our project manual review and then start to accept completed levee segments (distributed condensed O&M Manual) (ongoing)
   2. As per our trip to Richmond, Virginia, we are anticipating a set of their O & M manuals that we could gather information from.

B. Gary Sanitary District pump agreements
   1. The LCRBDC has agreed with the GSD that the four (4) east reach pump stations will hereby be referred to as follows:
      • Ironwood stormwater pumping station – (Stage II-4)
      • Broadway stormwater pumping station – (Stage II-3B)
      • Grant St. stormwater pumping station – (Stage II-3C-2)
      • North Burr St. stormwater pumping station – (Stage IV-2A)
   2. Refer to each stage/phase of these stations for current status in the Engineering Report.
      • A meeting is scheduled with the COE on December 10th, 1999 to field review the four (4) pump stations and other areas of concern.
3. A letter was sent to the COE on June 9th regarding GSD concerns for combined sewer overflow impact. GSD requested documentation that IDEM and the U.S. EPA agreed with this mode of operation. (Waiting for response)
   - This will be addressed in an upcoming meeting with GSD and the City of Gary after the preliminary field meeting with the COE.

4. A meeting is scheduled with the COE on December 10th, 1999, at 9:30 to field review the pump stations and review other GSD concerns.
   - A follow-up meeting will be scheduled with Gary/GSD to address their concerns.

C. WLTH Radio Tower (north of I-80/94, east of Martin Luther King Drive)
   1. The WLTH owners are concerned about increased flooding more than was anticipated. They have additional engineering studies and will be working with us as acquisition proceeds.

D. Mitigation (entire project area)
   1. LCRBDC still has concerns about the official COE mitigation plan which does not explain the exact procedure for acquisition in the Hobart Marsh area. (Ongoing)
   2. We had previously approved in our monthly board meeting, the use of an acre of our land to the Lake Co. Highway Dept. for mitigation for the construction of the new Colfax bridge.
      - We are in the process of finalizing our agreement granting Lake County Highway this property and having them assume all responsibility for maintenance, installation, etc.

E. Emergency Management
   1. The COE submitted to LCRBDC some mapping for comments on May 24th showing locations of all closures, sluice gates, sandbagging, etc.
      - We will break this down by community, to show what each community would need to do during a flood event. (Ongoing)

F. Landscaping
   1. A letter was sent to the COE on June 3rd accepting the landscaping project as per plans and specs, but re-stating the ongoing problem with the finished condition of the landscaping (needs more time to establish).
      - At our Technical Review meeting with the COE on November 9th, 1999, Greg Moore said he was finalizing specification changes for future projects as well as modifying procedures for the O & M.

G. Gary Parks & Recreation – Driving Range
   1. A meeting was held with the Gary Parks & Rec Dept. on May 18th to coordinate the current status and inform the following contractors that their proposals for Martin Design, Porter Lakes Engineering, and J.F. New were approved by the Board on May 6th, 1999.
      - At this point in time, permit applications and design are in the process.
2. A letter was sent to attorney Reising on October 12th, 1999, enclosing a cost breakdown, to date, showing $412,690.41 available for the driving range.

H. Lake Erie Land Company – Wetland banking
   1. The figures for developable acreage were re-calculated by Cole Associates and reviewed by the LCRBDC and the new total of all lands increased from 844 to 908 acres. This includes 613 acres of scrub area and 295 tillable acres.

I. We are considering improvements for 3120 Gerry St. (rental property) as follows:
   1. Received an estimate from Great Lakes Roofing on November 1, 1999 in the amount of $2,595 and from Gluth Bros. for $2,794.
   2. Received an estimate from Dyer Construction to pour a new concrete pad and move the existing garage out of the work limits on December 3, 1999 in the amount of $4,800.

J. We received a quote from Rich Eriks Construction on December 1, 1999, in the amount of $550 to construct shelving in our storage area at 35th and Chase.

Re: Little Calumet River
Local Flood Protection and Recreation Project
Gary Sanitary District Issues and Concerns

Dear Mr. Samara:

With this letter we are transmitting a copy of a November 8, 1999 Greeley and Hansen letter which reiterates Gary Sanitary District's (GSD) issues and concerns related to the referenced project. At our November 9, 1999 meeting you indicated you wanted to have a field meeting to review GSD issues and concerns prior to meeting with GSD. We suggest the following dates for that meeting: December 6, 9 or 10. Please let me know as soon as possible whether any of these dates will work for you and other Corps personnel who will be attending.

Very truly yours,

R. W. ARMSTRONG & ASSOCIATES, INC.

PROPOSAL SUBMITTED TO:
Little Calumet Dr., Judy Vamos
PHONE: 219-703-0696
DATE: 11/29/99

6100 Southport Road
Adams Residence
CITY, STATE & ZIP CODE: Portland, IN
JOB LOCATION: 2190 Garage, Gary, IN

WE HEREBY SUBMIT SPECIFICATIONS FOR THE COMPLETE REMOVAL AND Replacement of the above roof area as per the following specification:

1. Remove the existing shingles and felt paper down to deck and haul away all debris from roof and job site. Surrounding area to be kept neat and clean at all times throughout project.

2. Replace damaged wood decking in kind or of like thickness to existing. Owner to be notified if decking is required and additional charges of $1.75 per sq. ft. are necessary.

3. Remove and replace existing lead over stacks with new stack flashing.

4. Remove and replace existing circulation vents with new aluminum circulation vents as required.

5. Mechanically fasten one layer of felt paper over entire wood roof deck. Install Ice & Water Shield in all valleys for added protection.

6. Install new standard three tab shingles to the entire roof area as per the manufacturer's specifications. Color choice by owner.

7. Remove all roofing material and debris from roof and job site upon completion.

COST - HOUSE: $2,595.00
COST - GARAGE: $1,395.00

WARRANTY

Upon completion of the work as specified and final approval of the owner, there will be a Twenty Five Year Manufacturer's Warranty and a Five Year Contractor's Warranty supplied to the building owner within fourteen days after final payment is received.

Great Lakes Roofing is a member of the
BETTER BUSINESS BUREAU the
NATIONAL ROOFING CONTRACTORS ASSOCIATION and the
MIDWEST ROOFING CONTRACTORS ASSOCIATION

We promise hereby to furnish material and labor - complete in accordance with specifications above, for the sum of:

AS NOTED ABOVE

Payment to be made as follows:

DUE UPON COMPLETION OF PROJECT

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner. Any additions or deletion from specifications below involving extra costs will be estimated prior to starting work, and will become an obligation of the owner above the estimate. All agreements contingent upon cash, checks or drafts not control. Owner to carry insurance and other necessary insurance.

Acceptance: The above price, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as above. I agree to pay for the cost, including reasonable attorney fees and expenses, for the filing of a written lien or any legal action necessary to recover payment. A finance charge of 11 1/2% per month will be added to any past due balances. This is an annual percentage rate of 10%.

PROJECT:  Melinda & Mike Adams residence
            3120 Gerry Street
            Gary, IN  (219-989-8983)

We propose to furnish necessary labor, materials and equipment to perform the following work, as per OUR interpretation of the plans and specifications, which is as follows:

HOUSE AND GARAGE ROOFS:

Tear off and remove all of the existing roofing.  Rake, sweep, and magnet drag the surrounding areas.  Haul all debris from the premises.

Furnish and install a new ice and water shield valley reinforcement with new underlayment felt covering the remaining roof sheathing.

Furnish and install a new Twenty-five year type seal tab shingle roof complete with all new vents, flashing, and individual ridge shingles.

Furnish a manufacturer's Twenty-five year limited warranty.

Furnish a building permit as required.

For the sum of... HOUSE ROOF...$2,794.00
GARAGE ROOF...$1,419.00

Call to make appointment 219-989-8983

TOTAL PRICE, AS HEREIN SPECIFIED: $ ____________

As Listed

Payment upon completion, unless otherwise stated.  Price subject to change if not accepted within thirty (30) days.

A mechanic's lien will be filed within 55 days of completion if account is not paid in full.  A finance charge of 1 1/2% per month will be added to all past due balances.  This is an annual percentage rate of 18%.

The above prices, specifications, and conditions are satisfactory and hereby accepted.  I hereby represent and acknowledge that I am the owner, or agent for the owner, of the property and hereby authorize you to perform the work as specified.  I agree to pay for the costs, including reasonable attorney fees and expenses, for the filing of a mechanic's lien or any legal action necessary to recover payments as outlined above.  Time is not of the essence for the Contractor.  Contractor gives to purchaser only those guarantees and warranties written above.

LAND ACQUISITION REPORT
Tuesday, December 7, 1999

STATUS (Stage II Phase I) – Harrison to Broadway – North Levee:
   Dyer Construction – Contract price $365,524

STATUS (Stage II Phase II) – Grant to Harrison – North Levee:
1. Project completed December 1, 1993
   Dyer/Ellas Construction – Contract price $1,220,386

STATUS (Stage II, Phase 3A (8A) – Georgia to Martin Luther King – South Levee:
   Ramirez & Marsch Construction – Contract price $2,275,023

STATUS (Stage II, Phase 3B) – Harrison to Georgia – South Levee:
1. Project currently 98% complete. (Minor pump station testing and final turnover of the
   Broadway pump station to GSD to be scheduled this fall.
2. Additional land will be required to extend a recreation trail off of the existing levee north of
IUN to allow recreation trail users
   • A letter was sent to the Board of Public Works on October 1st, 1999, requesting the
     necessary easement to construct this ramp.

STATUS (Stage II, Phase 3C2) – Grant to Harrison:
1. The re-location of the recreation trail due to the crossing at Grant St. would require
   agreements with the Steel City Truck Stop and the city of Gary to be able to cross Grant St.
   at the light at 32nd Ave.
   • We are considering moving the trail further east (nearer Gilroy Stadium) and coming
     south off the existing levee to 32nd Avenue. (A field meeting will be scheduled with the
     COE to agree to a new location.) (ongoing)

STATUS (Stage II, Phase 4) – Broadway to MLK Drive – North Levee:
1. A letter was sent to the Norfolk Southern Corporation on February 22nd, 1999, enclosing the
   easement agreements and the offer for these easements.
   • A follow-up letter was sent to the N.S. R.R. on March 26th, 1999, requesting a response
     to our previously submitted letter. (Ongoing)

STATUS (Stage III) – Chase to Grant:
   Kiewit Construction – Contract price $6,564,520
STATUS (Stage IV – Phase 1-North) – Cline to Burr (North of the Norfolk Southern RR):
1. As per the November 30th Real Estate meeting, the revised schedule for IV-1 (North) would be to advertise on Sept. 30th; award the contract on Nov. 15th; and have construction start when the weather permits.
   • Currently, the bids have been opened and Dillon Contractors, Inc. appear to be low bidder (see Engineering Report).
2. A modified location survey was completed and the demolition of the existing Taborski garage will be included as part of the flood control project. A new garage and driveway/culvert installation will be bid, and installed prior to construction.
   • A quote was received from Dale Nimetz to install a new driveway, culvert, and edging in the amount of $3,275
   • A letter was sent to Taborski on December 2nd, 1999, enclosing plans and specs for the garage and driveway, serving as a “sign-off” and concurrence by Taborski.
   • We received a letter from the COE on November 30th, 1999, indicating all costs will be creditable.

STATUS (Stage IV – Phase 1-South) – Cline to Burr (South of the Norfolk Southern RR):
1. The most recent schedule with the COE for Stage IV Phase 1 (South) would be to complete acquisition by December 30th, 1999, advertise on January 20, 2000; award contract on April 24, 2000; and have a construction start by May 21, 2000 with a one year scheduled completion.
2. The staging area will be located west of the EJ&E RR and north of Black Oak Road on properties currently owned by INDOT. The legals have been completed and we have forwarded easement agreements for approval.
   • The COE submitted information to Detroit and will need to write a letter acknowledging our responsibility to replace their mitigation area in kind.
3. Agreements for uniform offers were sent to both the Norfolk Southern Corporation and the E.J. & E. RR on November 15.

STATUS (Stage IV – Phase 2A) – Lake Etta – Burr to Clark:
1. All construction is currently completed. Pump test is scheduled for mid-April. (Refer to Engineering Report)

STATUS (Stage IV – Phase 2B) – Clark to Chase:
1. Construction currently 95% complete. Projected completion in late fall, 1999. (Refer to Engineering Report)

STATUS (Stage V – Phase 1) – Wicker Park Manor:
1. Project completed September 14, 1995
   Dyer Construction – Contract price $998,630

STATUS (Stage V – Phase 2) – Indianapolis to Kennedy – North Levee:
1. We received “final” real estate drawings from the COE on July 13th, requesting us to proceed with acquisition. (See engineering report for current construction schedule.)
   • We received final engineering plans and specifications from the COE on August 31st, 1999.
2. A letter was written to the COE on October 15th, 1999, requesting this project be divided into two separate parts to allow us to expedite acquisition. One part would be V-2A (all construction between Indianapolis and Northcote) and V-2B (all construction between Indianapolis and Kennedy).
   - The COE verbally acknowledged that we would divide this as we requested at our November 30th, 1999 Real Estate meeting.
   - We would pursue V-2A first to include the recreation features near Tri-State.
3. Cole Associates were given a contract on November 24th, 1999, based upon billable hours to do all West Reach property I.D.
4. A meeting will be scheduled with the North Township Trustee, and their board, after the appraiser is selected.

STATUS (Stage V – Phase 3) – Northcote to Indianapolis – (Woodmar Country Club):
1. We received “final” real estate drawings from the COE on July 13th, requesting us to proceed with the acquisition.
2. We received final engineering plans and specs from the COE on August 31st, 1999, which will allow the appraisal process to begin once the survey work has been completed.
   - The survey location work was completed on November 2nd, 1999, to the all existing, impacted tees, greens, fairways, bunkers, and bridges.
3. A coordination meeting was held with Woodmar on November 4th, 1999, to answer technical questions, review the current schedule, review the appraisal process, and discuss our appraiser and his qualifications.
4. Dale Kleszynski was contracted to do this appraisal.

STATUS (Stage VI) – Kennedy to Cline:
1. At our October 15th Real Estate meeting, the COE indicated Stage VI will be divided into 2 phases.
   - Stage VI P1 (north of the river all construction and south of the river Kennedy to Grace)
   - Stage VI P2 (south of the river Grace to Cline and the north Grace St. pump station)
   - The current schedule for completing acquisition at our November 30th, 1999, Real Estate meeting is August 1st, 2000.

Burr St. (Betterment) levee – Arbogast to Burr:
1. The current schedule as per our November 30th, 1999 Real Estate meeting for Burr St. – Stage 1, indicates we would advertise by December 1999 and award contract by March 2000.
   - We are awaiting a letter from the COE confirming that (2) oaks will not be removed from DC – 606 (East of Colfax and South of the NIPSCO R/W).
2. The current schedule for Burr St. – Stage 2 (East of Colfax and all remaining work eastward) indicates advertising on April 15, 2000; contract award July 15, 2000; and construction start on August 15, 2000 – with approx. one year to complete.
   - Final survey work to complete the appraisal process West of Clark and South of the N.S. RR. is being completed by Great Lakes Engineering.
EAST REACH REMEDIATION AREA – (NORTH OF I-80/94, MLK TO I-65):
1. The construction start was September 1999, with an anticipated one-year completion.
   - The bid came in at $1,731,645.40 from Dyer Construction
2. Easement agreements were submitted to INDOT on October 15th, 1999, for (3) properties
   that will be necessary as part of the one year option.
   - A letter was sent to INDOT on October 28th, 1999, providing clarification and
     information regarding the installation of a sluice gate on the I-65 right-of-way.
   - Engineering reviewed and approved – format being reviewed in agreement.
3. The COE, at the November 30th, 1999 Real Estate meeting, reported that HQ in
   Washington has reversed its decision not to allow crediting. Crediting will be allowed
   on flowage properties – approximately $500,000.

WEST EACH PUMP STATIONS – PHASE 1
1. These stations include Baring, Hohman-Munster, Walnut and South Kennedy.
2. We received a letter from the COE Real Estate dated October 5th, 1999, (received on October
   12th) requesting right-of-entry.
3. We sent out the easement agreements for the 4 owners to approve – INDOT, North
   Township, Town of Munster and City of Hammond on November 8th, 1999
   - Agreements are ongoing.
   - The COE revised the target date for pump station 1A contract to November 30th,
     1999, at our November 30th, 1999 Real Estate meeting.

RE: Dave Tabor's Driveway

Excavate, install culvert, edging and
#73 stone including all labor
and material.

Total cost for above will be

$3,275.00

Thank you,

Dale Nimetz
November 15, 1999

Mr. & Mrs. David Taborski
3036 Calhoun Street
Gary, Indiana 46406

Dear Mr. & Mrs. Taborski:

Attached is “Exhibit A” indicating the final layout for the installation of your new garage, sidewalk, and driveway with the specification for the driveway thereon, which were completed as per our previous conversations. Also attached is “Exhibit B” which has the specifications for the installation of the new 24’ x 24’ garage. Our intent is to give you, at least in kind, that which will be demolished as part of our flood control project. Both attachments are based upon field meetings, and your verbal concurrence, from meetings on your property on October 22nd and November 11, 1999.

The following are also terms and conditions based upon verbal conversations and field meetings:

**Item #1** – You have the right to demolish or disassemble the existing 24’ x 24’ garage and salvage all materials therein.
- You have until May 15, 2000 to do this or the contractor will have the right to demolish and remove as per his contract.
- All materials you salvage shall be removed from those easements previously signed.

**Item #2** – The Development Commission will provide for moving of contents by 2 men for a full 8-hour day from the existing garage to the new.
- Their scope shall only be limited to moving the contents therein.

**Item #3** – The existing storage shed will be removed by the contractor as part of their contract with the Army Corps of Engineers.

**Item #4** – That portion of the existing garage and the stoned driveway not removed by you by May 15th will be done by the COE contractor as part of the contract for the installation of our flood control project.
- This will include the concrete slab and apron, existing stone for the driveway and the culvert, fill, and driveway ramp up to the west pavement edge of Calhoun Street.
Those areas of excavation will be backfilled with clean black dirt, and be graded and seeded to match adjacent grades.  

Item #5 – The existing location of the swimming pool and vertical structural supports will not be disturbed. The flood control project contractor will work around this area.

By signing this letter, the owners (David A. and Karen Taborski) concur with attached “Exhibit A” and “Exhibit B” and the five (5) items listed and offer no contest to the context of this letter herein. The Development Commission also agrees to both Exhibits and all items listed herein.

If you have any questions, disagreements, or would offer any additional items to these items or exhibits, please respond in writing at your earliest convenience. If we do not receive anything in writing from you, we will assume you acknowledge these terms. Will you please both sign 2 copies of this letter and return one copy to us to guarantee yourselves and the Development Commission that we are in agreement to these terms.

Sincerely,

Dan Gardner  
Executive Director

/attach.

"EXHIBIT A"

General Driveway Specification:

1. Driveway is approx. 75' long x 10' wide.

2. Install 6" of Indiana #79 stone (after compaction).

3. After completion of garage construction, contractor to provide additional fill as necessary and re-grade.

4. Install 6"x6" yellowwood edging as required adjacent to at-grade driveway.

5. Driveway to have approx. 25' at level area adjacent to, and to match existing pavement elevation, of Calhoun Street.

6. Excavated clean fill from driveway excavation may be used to build up area adjacent to Calhoun.

7. Elevation of top of stone adjacent to future installation of concrete apron to be field determined by owner (Trbovski).

PROPOSAL FOR CONSTRUCTION
OF A 24' X 24' GARAGE
SPECIFICATION SHEET

1. Wood frame construction using 2" x 4" at 16" o.c. and 8' high, double top plates, 2" x 6" rafters at 24" o.c. with cross ties as necessary, roof pitch 4/12 with a gable roof, all hips and ridges to be 2" x 8".
   - Contractor to install two (2) diagonal support braces to each 2" x 6" rafter.
2. Construction does not include any demolition.
3. Concrete slab to be 24' x 24' x 4" thick using 6 x 6 x #10 woven wire mesh reinforcing.
   - To also include a 3' x 24' concrete apron.
   - Little or no grading will be required. All excavated material shall be removed from the site (including dirt and grass).
   - Concrete to have water ledge and the 2" x 4" base plate on top of the ledge shall be treated.
   - Concrete to be sealed after installation as per manufacturer's specifications.
   - Concrete shall have a 12" x 12" ground formed foundation.
   - Install approx. 75’ of 4’ wide sidewalk as shown on the attached layout drawing, having a minimum thickness of 4”.
4. Use a double 2" x 12" header above garage door.
5. Install a 7' x 16' insulated steel overhead door complete with 1/2 H.P. electric operator and two (2) remote controls.
   - Contractor shall also install one remote push button opener in the house as designated by the owner.
6. Install one (1) 3' x 6' – 8" steel service door to be primed and painted, complete with lock.
7. Install one (1) 2' 4" high x 5' 0" wide sliding window (vinyl coated) complete with locking mechanism.
8. All walls shall be 1/2" O.S.B. sheathing.
9. Roof shall have 1/2" O.S.B. sheathing complete with felt paper and asphalt shingles.
   (Color & type of shingles to be selected by owner)
   - Install two (2) roof vents
10. Garage shall have vinyl siding, fascia, and soffitt. No gutters or downspouts will be required. (Color to be selected by owner)
11. Electric – Contractor to install two (2) exterior lights either side of garage door (Install light switch inside house). Four (4) interior lights, and nine (9) duplex receptacles, and one (1) exterior weather-proof receptacle.
   - This will be single phase, 120 volt installation
   - Contractor to coordinate with NIPSCO
   - All wiring to be installed in metal conduit as recognized by the National Electric Code.
   - Contractor can re-use existing 100 amp distribution panel
12. Driveway – Will be installed by others prior to garage construction.
13. All necessary permits will be paid for and obtained by the contractor.
14. Contractor shall assume all liability while on the owner’s property.
15. Contractor shall have necessary insurance, and submit with his bid, a copy of this insurance.
16. Contractor shall locate all underground utilities.

Programs and Project Management Division
Project Management Branch

Mr. James E. Pokrajac
Agent, Land Acquisition
Little Calumet River Basin
Development Commission
6100 Southport Rd.
Portage, Indiana 46368

Dear Mr. Pokrajac:

Thank you for the letter of November 22, 1999 regarding credit for installation cost of a new garage and driveway for the Taborski parcel, west of Calhoun and north of the Norfolk Southern railroad. In accordance with the amendment to the project Plans and Specifications, the demolition of the garage and the concrete foundation slab are part of the project costs. Construction of the driveway and the removal of the apron and culvert adjacent to Calhoun Street is not part of this contract and will be the Local Sponsor responsibility. Modifying the contract at this time, to include the additional work will be too expensive and time consuming. This additional Local Sponsor cost, will be credited with other relocation costs.

If there are any additional questions please contact Mr. Jan S. Piachta of this office at (312) 353-6400. Extension 1801.

Sincerely;

[Signature]

The Corps estimated the remaining tracts based on available information. For Stage VII and VIII, the Corps simply used the number of records that have been created in the Tracking System. Thus, the estimation is most likely too conservative, but will be used for the purpose of this report. Acquisition of the remaining tracts is required within the next three years.

The next procedure was separating the time required of Judy Vamos. The following table separates tasks Judy has performed singularly:

November 8, 1999

Mr. Stan Dostatni
City Engineer
City of Hammond
5925 Calumet Avenue
Hammond, Indiana 46320

Enclosed please find five (5) copies of a perpetual pump easement needed for the Walnut Avenue Pump Station, located at North River Drive and Walnut Avenue in Hammond, IN. This is an existing pump station currently operated and maintained by the Hammond Sanitary District. As part of our flood control project for the Little Calumet River, the Army Corps is upgrading and rebuilding the existing pump station. The Hammond Sanitary District has committed to continue operation and maintenance of the pump station after construction.

This pump station sits on property owned by the city of Hammond. Since the property is owned by the city, the city’s approval and signature is required, as well as Hammond Sanitary District, who will maintain this station. Attached to the easement agreement is a map and legal description of the property needed.

Will you please process this agreement and obtain the necessary signatures from the appropriate parties within the city. Once the city has approved this agreement and returned the copies to our office, we will obtain approval and signatures from the Hammond Sanitary District and this Commission. After recording, we will send 2 copies back to your office for your files.

We thank you for your timely attention to this matter. If you have any questions, please call me at the above number.

Sincerely,

James E. Pokrajac, Agent
Land Management/Engineering

Lou Casale, LCRBDC attorney
PROJECT ENGINEERING
MONTHLY STATUS REPORT
Tuesday, December 7, 1999

STATUS (Stage II Phase 1) Harrison to Broadway – North Levee:
   Dyer Construction – Contract price $365,524

STATUS (Stage II Phase II) Grant to Harrison – South Levee:
1. Project completed on December 1, 1993.
   Dyer/Ellas Construction – Contract price $1,220,386

STATUS (Stage II Phase 3A) Georgia to Martin Luther King – South Levee:
   Ramirez & Marsch Construction – Contract price $2,275,023

Landscaping Contract (This contract includes all completed levee segments – installing, planting zones, seeding, and landscaping):
1. Dyer Construction – Final contract cost $1,292,066
   • Overrun (over original bid) $200,016
     Project completed June 11, 1999

STATUS (Stage II Phase 3B) Harrison to Georgia – South Levee:
1. Rausch Construction started on 11/20/95. (Construction is approx. 98% complete)
   • Currently $3,280,112.42 has been spent on this project.
   • Overrun (over original bid) $183,281.60
   • Balance (to be paid to contractor) $197,137.00
2. Broadway pumps station remains to be inspected and tested.
   A. Final testing and turnover to Gary Sanitary District is pending. Waiting on contractor response to complete testing. (Still waiting to schedule operational test)
3. Survey work has been completed to re-route recreation trail off of existing levee North of IUN to cross at 32nd Avenue. (Refer to Recreation report)
   • City of Gary (Board of Public Works) has signed the easement agreement as of November 24th, 1999.
4. The COE sent a final punch list to Rausch Construction on August 25th requesting these items be ready for final inspection no later than September 24th.
   • It is currently not inspected as of this meeting.

STATUS (Stage II Phase 3C2) Grant to Harrison: (8A contract)
1. The overall project is 98% complete, and the final scheduled completion is for the end of September 1999.
   • The final inspection was made by the COE on July 15th and eleven (11) items remain to be completed on the punch list.
   • Currently, $3,890,000 has been spent on this project.
   • Overrun (over original bid) $463,196
• **Balance (to be paid to contractor)** $189,875

2. The operational test for the Grant Street pumping station was held on November 19th, 1998, with LCRBDC, COE, GSD, and the City of Gary.
   A. The tests were completed and the pump station was found to be satisfactory as per COE plans and specs with the exception of minor punch list items. (These are currently being completed.) COE to inform us as of its completion – ongoing as of October 4th, 1998.

**STATUS (Stage II Phase 4) Broadway to MLK Drive – North Levee:**

1. All structural levee work completed. All grading and backfilling have been completed.
   A. Project is approx. 98% completed, was anticipated for overall completion on September of 1999. (All work is completed except for the pump station)
   • **Overrun (over original bid)** $1,096,378
   • **Balance (to be paid to contractor)** $11,070
   B. Current money spent to date is $4,175,000

2. This portion of levee construction has been completed.
   A. The pump station has been completed and is ready to be tested. (The meter has been installed as of December 9th, 1998, which will begin the 30 month payback agreement to NIPSCO by the GSD.)
   • Contractor and COE still coordinating to schedule the pump test. (For over one year.)

3. The COE sent a final punch list to Rausch Construction on August 25th requesting that these items be ready for final inspection no later than September 24th.
   • It is currently not inspected as of this meeting.

**STATUS (STAGE III) Chase to Grant Street:**

   Kiewit Construction – Contract price $6,564,520.

2. We received a letter from the COE on March 17th, 1999, including design recommendations, and requesting our comments and review for the STAGE III DRAINAGE REMEDIATION PLAN.
   • We submitted sets for review to the Gary Sanitary District and the Lake Erie Land company on April 6. We are awaiting their response and will have a coordination meeting for drainage in the entire Grant Street area with Gary, GSD, COE, and LCRBDC upon receipt. (Ongoing)
   • A coordination meeting was held with the LCRBDC and Greely & Hansen (representing the GSD) on September 17th, that reviewed the overall drainage problems on both sides of Grant St. We are working with them to develop a comprehensive plan for drainage in this area.
   • The COE has agreed to a field meeting with the LCRBDC on December 10th, 1999, to discuss this concern. A follow-up meeting will be scheduled with the GSD shortly thereafter.
STATUS (Stage IV Phase 1 - North) Cline to Burr (North of the Norfolk Southern Railroad):
1. IV-1 (North) The drainage system from Colfax to Burr Street North of the Norfolk Southern RR.
   A. This project was advertised on November 3rd, 1999, scheduled to be awarded on November 30th, 1999, and get the notice to proceed on January 15th, 2000.
   B. A conference call was held with the COE and a supplier on November 22nd, 1999, to consider a value engineering option to substitute interlocking concrete block in the ditch bottom in lieu of pouring a concrete slab.
      • The LCRBDC rejected this request because of O & M costs after completion as well as construction of drainage because it would not have as smooth a flow.
      • We received an email on November 10th, 1999, from the COE with the bid opening results.
      • The apparent low bidder was Dillon Contractors, Inc. with a total base bid of $2,708,720, which was approximately 80% of the government estimate.

STATUS (Stage IV Phase 1 – South) (South of the N.S. RR.)
1. IV-1 (South) The remainder of the IV-1 project not included as part of IV-1 (North), primarily all of the construction South of the N.S. RR.
   • The current schedule is to advertise on 4/20/00; award 7/24/00; and construction start on 8/21/00.
2. A field coordination meeting was held on July 16th with the COE, NIPSCO, Ameritech, Lake County Highway, and the LCRBDC to review the relocation of utilities to serve the WIND facility.
   • We received a set of proposed NIPSCO/Ameritech relocate plans from NIPSCO on November 8th, 1999, and submitted them to the COE for review and comments on November 11th, 1999.
   • We received a letter from the COE on December 2nd, 1999, concurring with their recommendation, but requested that a temporary line be installed outside of the COE work limits.
3. The COE wrote a letter to INDOT on Jan. 22nd (We got a copy on Feb. 25th) suggesting coordination for our work limits extending onto an already created mitigation area.
   • We are awaiting written approval from the Detroit Corps along with their recommendations to re-enhance the existing mitigation area used by INDOT.
   • The COE sent a letter to Ed Tang (INDOT Cline Ave. project manager) on November 5th, 1999, indicating that electrical power poles have been installed within our work limits and suggested relocation.

STATUS (Stage IV Phase 2A) Burr to Clark – Lake Etta:
1. Dyer Construction-95% complete.
   A. Currently, $3,174,000 has been spent on this project.
      • Overrun (over original bid) $901,779
      • Balance (to be paid to contractor) $201,090
2. The North Burr Street stormwater pumping station has been completed.
A. The operational test was held on March 2, 1999. The follow-up inspection was held on March 30, 1999.

B. We received a letter from the COE on May 3rd (dated April 28th) that the pump station training was performed on April 22nd with the designated reps of the GSD.

C. The LCRBDC met with the COE, Dyer Construction (general contractor), and Austgen Electric (pump station sub-contractor) on May 3rd and accepted part of the spare parts.
   • The remainder of the spare parts were received on November 22nd, 1999. The parts are currently in our storage room at 35th and Chase.
   • GSD will not accept responsibility for any pump station until all issues are resolved and turnovers completed. (Refer to Land Management Report)

D. We received a copy of a letter from the COE on September 3rd, 1999, indicating final items to be completed prior to the upcoming final inspection.

STATUS (Stage IV Phase 2B) Clark to Chase
1. 100% of levee construction has been completed, and the projected overall completion is for the fall of 1999.
   • The gatewell closure structure West of Chase St. has been repaired, inspected, and accepted by the COE.
   • The stoning for that area East to Chase St. for our recreation trail should be completed in 1999.
   • Bollards and signage to be installed.

2. Project money status:
   • $1,779,158 has been spent.
   • Overrun (over original bid) $288,957
   • Balance (to be paid to contractor) $40,157

STATUS (Betterment Levee) EJ&E to Burr Street (North of NIPSCO R/W), across RR, then north of railroad R/W eastward ½ way to Clark, thence south.
1. COE projects levee installation along the east R/W line of the EJ&E RR across the NIPSCO north R/W line, then extending levee east from the EJ&E RR along the north side of the NIPSCO R/W, thence east to Burr Street, thence north across the Norfolk Southern RR, then East (north of the RR right-of-way) ½ way between Burr and Clark, then back south over the RR, and then going back approx. 1400’ south.

A. It has been verbally agreed that this will be broken up into (2) segments as follows: (refer to the Land Acquisition report)
   • Phase 1 will include levee and ditch work from the E.J. & E R.R to Colfax Ave., including a one-year option on the work on the E.J. & E. R/W and the Colfax Road raise.
   • Phase 2 will include the remainder not included as part of Phase 1, primarily from Colfax to the area ½ between Burr and Clark.

2. The COE sent a letter to Marathon on Feb. 19th requesting information on cost and design for lowering their 6” pipeline west of Arbogast and north of the NIPSCO R/W.
A. We received a modified cost estimate from Marathon pipeline for a cost of $183,543 without contingencies on May 12th.
   • Agreement currently being worked on by Attorney Casale.
B. NIPSCO submitted a cost estimate for gas facilities adjustments from the EJ&E through Colfax as part of the Phase 1 construction in the amount of $120,107.
   • Attorney Casale sent agreement to NIPSCO on December 2nd, 1999.
3. We received a letter from the E.J. & E. R.R. on September 1st, 1999 (forwarded to Lou for review & comments on September 8th) regarding recreational trail crossing at grade.
   • Awaiting design information from the E.J. &E. RR. and the COE to proceed with agreement.

STATUS Cline to EJ&E RR – Local Project:
1. Levee completed, including tie-back at Cline Ave., from Cline Ave. East to a point approx. 70' from the West R/W line of the E.J. & E. RR.
2. The levee was completed and inspected on October 21st, 1999.
   • As “as-built” location survey was completed by Great Lakes Engineering on November 10th, 1999, and was sent to the COE on November 11th, 1999, showing the installation to be 18’ further North than the center line of our levee East of the E.J. & E.
3. A letter was written to the COE on November 22nd, 1999, enclosing center line elevations submitted to us by the Griffith engineering consultant on November 19th, 1999.
4. We received a letter from the Town of Griffith on September 7th, 1999, acknowledging their responsibility for maintenance, repair, and replacement if destroyed.

STATUS (Stage V Phase 1) Wicker Park Manor:
1. Project completed on September 14, 1995.
   Dyer Construction – Contract price $998,630
2. As per a conversation with Phillips Pipeline on 9/30/96, consideration is being given to do a directional bore or both 8” lines, rather than do 2 “up and overs” for both levees (This has been ongoing with the COE since November of 1996)
   A. The COE indicated in their response for Stage V – Phase 2, that this was not economically feasible. We still contend this should be done as an item of safety. (ongoing)
   B. Letter was received from Phillips Pipeline on 9/27/99 requesting expansion of the scope of work of original agreement with them to allow for design and survey work at a cost to us of $20-25,000.
   C. Flora wrote a letter to the COE on September 29th, 1999, requesting their consideration to credit this cost and to have it by our October 7th, 1999 meeting (We have not received this as of November 5th).

STATUS (Stage V Phase 2):
1. At the July 23rd, 1998 Real Estate meeting, the current schedule shows a January 1st, 2001 contract award date. (This will be reviewed by the Commission.)
2. The COE agreed at our November 30th, 1999 Real Estate meeting to divide this into two (2) segments. V-2A (Indianapolis Blvd, to Northcote), and V-2B (Indianapolis Blvd. to Kennedy).
3. A letter was written to Greg Cvikovich (North Township Trustee) on October 15th, 1999, informing them of the upcoming survey and the current schedule for construction.
   - We anticipate the completed location and tie-in survey by Cole Associates no later than December 17th, 1999.

**STATUS (Stage V Phase 3) Woodmar Country Club:**
1. Refer to Land Acquisition report for status of appraisal process and revised schedule.
2. A letter was sent to Bob Girot (representing Woodmar C.C.) informing them of the upcoming survey, the current schedule for construction, and a meeting on November 4th, 1999, to review the schedule, appraisal process, and construction impact.
   - Survey work was completed by Cole Associates on November 2nd, 1999, and was used for discussion at our November 4th, 1999 coordination/update meeting at Woodmar.

**STATUS Stage VI:**
1. Had meeting on 1/18/96 with Super 8, Holiday Inn, and Motel 6 with the COE attending regarding levee impact to the properties and how we will proceed.
2. The survey work to field determine project coordinates has been completed and was sent to the COE on August 23rd. Final engineering and real estate layouts are ongoing with the COE.

**Status (Stage VII) Northcote to Columbia:**
1. We received a request from the COE to start point definition for project coordinates to allow the engineering firm information to plot their coordinates.
2. A pre-design meeting was held with Earth Tech Environmental and the COE on November 23rd, 1999, to field review the project and discuss local concerns in the Griffith field office (refer to handout).
3. A letter was sent to the COE on December 6th, 1999, suggesting lists of FDM5 prints to be sent to Hammond/Munster to review prior to a public meeting with their public officials in mid-January, 2000.

**STATUS (Stage VIII) Columbia to the Illinois State Line):**
1. We received a letter from the COE on March 15th, 1999 requesting our review and comments for their A/E scope of work.
   A. The A/E award was given to S.E.H. (Short, Elliot & Henderson Inc.)
   - Negotiations with SEH are ongoing with the COE to determine final contract cost – original estimate by SEH is almost triple what was estimated by the COE.
2. We received a request from the COE to start point definition for project coordinates to allow the engineering firm information to plot their coordinates.

**East Reach Remediation Area – North of I-80/94, MLK to I-65:**
1. A pre-construction meeting was held with the COE, LCRBDC, GSD, Dyer Construction, and the City of Gary on September 9th, 1999.
2. Construction started on approx. September 13th, (clearing and grubbing), clay was hauled starting on approx. September 28th, and the inspection trench is currently completed and approx. 80% of the clay is in place.

**West Reach Pump Stations – Phase 1:**
1. The four (4) pump stations that are included in this initial West Reach pump station project are Baring, Walnut, S. Kennedy, and Hohman/Munster.
2. A letter was sent to the Hammond Sanitary District on August 26th suggesting they pursue damage to one of the pipes serving the south Kennedy pump station by INDOT.
   - In their letter dated October 22nd, 1999, the HSD indicated that they are working with INDOT to get them to repair the damage they caused. *(ongoing)*
3. We completed our review to the COE on October 19th, 1999. We received response to our comments from the COE on November 16th, 1999.
   - We wrote a letter to the COE on November 30th, 1999, regarding concerns for standby pumping and South Kennedy discharge that were not addressed.

**West Reach Pump Stations – Phase 2:**
1. A letter was sent to John Bach (Town of Highland) on October 22nd, 1999, indicating that the pump station work for Highland (81st Street, and North and South 5th Street stations) will be advertised on June 15th, 2000.

**General:**
1. A 50% dedication ceremony was held by the COE/LCRBDC on November 12th, 1999. Attending were senators, congressmen, mayors and COE officers in addition to commissioners and the media.
2. A technical review meeting is scheduled with the Corps on November 9th, 1999, to review ongoing engineering concerns.
3. Pokrakac attended a formliner presentation at the Chicago COE office on October 29th, 1999 to review alternate I-wall surfaces that could possibly be used for upcoming West Reach construction.
   - These finishes appear to be approx. 5% more expensive to use than the current “fin-type) of finish. The COE will investigate cost differential, then we can discuss.
   - We submitted a letter, along with COE plans and specs to R & J Construction from Warrneville, Illinois, requesting cost information which would allow us to discuss with the COE how we will proceed.
Sandy this is for your information regarding the low bid contractor for Stage IV-1 North. Please share with your Board and Commission.

RE: Electric Relocate to the WIND Radio Station Towers  

Dear Mr. Pokerjack,

Enclosed are 3-copies of the proposed Nipsco electric relocate marked up on the Army Corps drawing. The proposal is to relocate the existing underground primary electric cable by installing 5-new poles and approximately 772' of overhead 12.5KV 3PH primary and neutral conductors between the proposed levee and ditch. The existing underground primary cable that feeds the padmount transformer by the radio station building will have to be located, cut, and spliced onto new cable that will go to the new pole at the west end of the pole line completing the new feed.

If you have any questions, please call me at 219-853-5082.

Sincerely,

[Signature]

Frank Janosi  
Distribution Project Engineer
November 11, 1999

Mr. Imad Samara  
U.S. Army Corps of Engineers

Chicago, Illinois 60606-7206

Dear Imad:

Enclosed is a copy of a letter from NIPSCO dated November 8th, along with a marked-up print for the proposed electric relocate to serve the WIND Radio Station from Colfax Avenue. This proposed relocation was coordinated between NIPSCO and Ameritech and will require comments and review from the Army Corps.

At your earliest convenience, will you please make arrangements to review the attached print and coordinate any changes, suggestions, or revisions with Mr. Jim Flora at 219/738-2258. If you have any questions regarding the coordination of real estate or agreements regarding this installation, please call me.

Sincerely,

Dear Mr. Pokrajac:

In response to your letter dated November 11, 1999, regarding relocation of the NIPSCO power line serving the WIND Radio Station we in general concur with the recommendation. However, during the construction period the power poles will have to be located temporarily outside of our work limits.

If you have any additional questions please contact Mr. Jan S. Plachta of this office at (312) 353-6400, ext. 1801.

Sincerely,

Imad Samara

Indianapolis, IN 46204-2216

Dear Mr. Teng;

It come to our attention that new electrical power poles have been lately installed within the levee limits of our Little Calumet River Flood Control project, Stage IV, Phase 1, South. The poles are located east of intersection of Cline Ave. and the I-80/94 expressway, in vicinity of EJ&E railroad intersection with Black Oak Road. This project will be advertised in January 2000 and construction will start in Spring 2000. Please review the enclosed field sketch as soon as possible. Detailed survey concerning location of these poles will be prepared shortly and the results will be forwarded to your office. To keep this flood control project on schedule the subject poles and the underground lines will have to be relocated outside of the work limits before April of 2000.

If you have any additional questions please contact Mr. Jan Plachta at (312) 353-6400, extension 1801.

Sincerely;

Imad Samara

Re: As-Built Location Survey for Griffith Levee Extension

Dear Sir:

As per your request GLE has performed an As-Built Location Survey for the Griffith Levee Extension that was completed earlier this year. Attached is a drawing dated November 10, 1999 that depicts the location of the Griffith Levee Extension in relation to the proposed Burr Street Betterment Levee that will be extended to the East. The proposed layout for the Burr Street Betterment Levee was obtained from US Army Corps of Engineers Chicago District, Real Estate Map RE-2, dated February 1999. As shown on our drawing from field locations, the Griffith Levee Extension is wider from toe to toe than proposed on the COE drawing which has caused the centerline of the Griffith Levee to move 18 feet to the north. We have included coordinates on the drawing for the toe and centerline of the existing levee for any future engineering work. Please feel free to contact me if you have any questions regarding this matter.

Sincerely,

Great Lakes Engineering, L.L.C.

Mr. Imad Samara
U.S. Army Corps of Engineers
111 N. Canal Street
Chicago, Illinois 60606-7206

Dear Imad:

Enclosed is a copy of the as-built location survey for the Griffith levee extension between Cline Avenue and the EJ&E RR. Also enclosed is a copy of the letter submitted to us by Great Lakes Engineering dated November 10th explaining the location of the new installation. It appears that the center line of the Griffith levee is 18' north of our center line which will tie in on the east side of the EJ&E RR as part of our betterment levee Phase 1 project.

Incorporate this information as necessary in the plans and specs in order that the center lines of both levees match. It appears that a meeting might be necessary to clarify this difference. If you would want me to facilitate this meeting, or if you have any questions, please contact me.

Sincerely,

James E. Pokrajac, Agent

Re: Pump Station Rehabilitation Project - Phase 1  
100% BCO Comment Responses

Dear Mr. Samara:

We have reviewed the response to our 100% BCO comments on the above referenced project. We still have particular concerns regarding two items:

1. Our comment no. 3 requested specifics on when the capacity of the discharge conduits from South Kennedy Pump Station would be addressed. This comment was not answered.

2. Our comment no. 13 asked a number of questions regarding standby pumping for which we received answers. Those answers however raise the following questions and concerns:

a. Who decided that having the ability to pump 75% of the pump station capacity during construction was acceptable. Please explain how this was determined and found to be acceptable to the Corps. At this time we cannot agree that it is acceptable.

b. The response indicates that two portable pumps will be provided under this contract. It goes on to say that “both pumps will be used for one pump station at a time” and that there are two pump stations requiring portable pumps. Since a storm event will affect both pump stations it would appear that four (4) portable pumps will be needed unless rehabilitation work is scheduled in a way that only one of these pumps stations will have a pump out of service at a time. We are pursuing current scheduling information for the proposed Baring Avenue Pump Station Relief Sewer, since its completion may impact the number of standby pumps required.
Please provide your response to these questions at your earliest convenience.

Very truly yours,

R. W. ARMSTRONG & ASSOCIATES, INC.

PROJECT: Little Calumet River, Indiana

AUTHORIZATION: Water Resources Development Act of 1986

TYPE: Flood Control and Recreation - Construction

PROJECT DESCRIPTION: The project includes constructing 22 miles of levees and floodwalls, installing a control structure at Hart Ditch, building almost 17 miles of hiking trails and preserving over 750 acres of wetland. The project also involves relocating seven miles of river channel to allow better water flow, modifying highway bridges to permit unobstructed flow of water and installing a flood warning system.

The project will protect more than 9,500 homes and businesses in Gary, Griffith, Hammond, Highland and Munster, preventing nearly $11 million in average annual flood damage. Construction began in 1990 and is expected to be completed in 2008.

CURRENT STATUS: The project is currently in the construction phase. Approximately 45 percent of the total project is complete. The project is divided into two sections. The east reach, which is mainly in Gary, Ind., extends from Cline Avenue to I-65. The west reach covers the area from the Illinois/Indiana state line to Cline Avenue. The federal flood control construction of the project is divided into eight geographical stages, totaling over 27 construction contracts. To date, 11 of the contracts have been completed, including four contracts for demolition of structures, five levee contracts, a recreation contract on the East Reach and one landscaping contract. Contracts currently in place provide for continuing construction of the south levees Harrison to Georgia and north levees Burr to Clark, Broadway to King, Grant to Harrison and Clark to Chase.

The district is currently working on plans and specifications for contracts to be awarded in fiscal year 2000. Those contracts will include installation of a new stormwater drainage system north of the NS Railroad, levee work south of the NS Railroad, a betterment levee from EJ&E to Burr Street and rehabilitating pump station pumps in Hammond and Munster.

PLANNED WORK:

FY 00:
* Complete construction of north levee from Burr to Clark, Clark to Chase and from Broadway to Martin Luther King Drive; south levee from Grant to Harrison; and East Reach remediation.
* Initiate construction on north and south levees from Cline to Burr and the Burr Street betterment levee.
* Continue design, construction management and project management.

Little Calumet Flood Control project reaches halfway mark

The work is scheduled for completion in 2008.

BY LAURI HARVEY
Times Staff Writer

GARY - Local, state and federal officials gathered Friday morning at Lake Etta Park in Gary to celebrate the completion of half of the Little Calumet River Flood Control and Recreation Project.

"We are at the halfway point, and it will be complete, I think, in all of our lifetimes," said U.S. Rep. Pete Visclosky, D-Ind. "Clearly, there are important things that are taking place here."

The Little Calumet River basin historically has been affected by flooding. This project is intended to help prevent flood damage to more than 9,500 homes in Gary, Griffith, Hammond, Highland and Munster. In November 1990, flooding reached disaster level in Hammond, Highland and Munster with an estimated $35 million in flood damages and one death.

President Clinton declared the flood zone a National Disaster Area.

"People over a three-decade period of time have cooperated with one another for a region-spanning effort to improve the quality of life for everyone, regardless of where they live," Visclosky said.

The project covers 22 miles along the river from the Illinois state line east and encompasses the construction of 22 miles of levees and flood walls, upgrades to pumping plants, modifications of bridges and channels and the establishment of a flood warning system. When the project is complete in 2008, it will include 17 miles of new hiking trails along the river and the preservation of more than 750 acres of wetlands.

Construction began in 1990 after nearly 20 years of planning.

Lt. Col. Peter Rowan of the U.S. Army Corps of Engineers said the project is expected to be completed by 2008. Rowan said the work is estimated to save $11.5 million annually in flood damage.

Indiana Rep. Chet Dobis, D-Merrillville, said he is looking forward to the completion of the project.

"In the basements that aren't getting flooded anymore, little by little, the residents are beginning to feel the benefits of this project," Dobis said.

Executive Director, Little Calumet River Basin Development Commission

Closing Remarks..........Peter Visclosky

Facilities Tour and Refreshments
I have revised the minutes in accordance with your comments. Part of the FAX copy was hard to read, so please review and let me know if any changes are needed.

Thanks;

Jan

Little Calumet River Flood Control Project status review meeting was held on Tuesday, November 9, 1999, at 9:00 a.m. at the Engineering Division Conference Room. Attendees at the meeting were:

- Dan Gardner       LCRBDC
- Jim Pokrajac     LCRBDC
- Jim Flora        Consultant - LCRBDC
- Imad Samara      PP-PM
- Joe Schmidt      ED-D
- Jim Mazanec      ED-HH
- Leslie Bush      ED-G
- Emmett Clancy    RE-A
- Greg Moore       PD-S
- Huma Nisar       ED-DC
- Jan Plachta      PP-PM
- Eric Sampson     ED-DS
- Bharat Shah      ED-DG

Imad Samara, the Project Manager discussed status of Stage IV, Phase 1, North and South Projects. Discussed were bid opening results of the IV-1, North. Apparent low bidder is Dillon Contractors, Inc. from Frankford, IN. His bid was $2,708,720, almost $700,000 below the Government Estimate Without Profit. The second low bidder was Rausch Construction Co. with bid of $3,996,250. Before award preaward survey will be taken. Bonding takes about 10 days. Plans and Specifications for IV-1, South are under review right now. Comments are expected by November 18\textsuperscript{th}. Review comments will be incorporated by December 2\textsuperscript{nd}. CBD announcement will be ready by December 9\textsuperscript{th} and the project advertisement is expected by December 30\textsuperscript{th}. Bob Behrns is out in field today for survey of INDOT power poles with transformers that were placed within our levee limits in vicinity of I-80, Black Oak Road and EJ&E railroad. Of concerns are the railroad issues.

Everybody was cooperative on the Pump Stations 1A project. Pittsburgh District is presently incorporating review comments. Advertisement is scheduled for November 30\textsuperscript{th}. Project VI-2 is doing OK., review comments are needed ASAP. Rani Engineering, 8\textsuperscript{th} Set Aside will do engineering on VI-2. Jim Pokrajac requested that the COE contact Cole Associates to clarify uncleared lines on their survey request. All other coordinates have been completed for over 2 weeks. VI-2 has recreational feature tying to Griffith levee. Jim Pokrajac stated that he mailed a letter to Imad indicating that the Griffith levee alignment (as installed) is 18 feet north of the centerline of our levee. There are no real estate changes to levee at VI-1. This design is important because of potential delay if we don’t get the real estate. Civil and Tech Support has lead on VI-1. We will have to decide what to do with Stage VIII. The Short Elliott Hendrickson Inc. proposal is three times higher than the Government Estimate. Should there be no revision to the bid price we will go with Earth Tech. Paul Mohrhardt has the lead. Jim Pokrajac said that the appraisal of WIND property will be hopefully ready next week. He also mentioned that NIPSCO and Ameritech have completed their proposal for utility relocation to service the WIND facility and
this will be forwarded to the COE for their review and comments. INDOT installed power poles with transformers at the center line of our levee. Letter has been mailed to INDOT asking for timely relocation of these poles before start of construction in spring of 2000.

IV-1 South is currently being reviewed locally and the Corps is scheduled to advertise this on December 30.

Mitigation Contract. LCRBDC said that they would be available for a conference call with the COE and Conservation Design Forum, Inc., on November 15th.

Burr Street, Phase 1. The MOA has been completed and is currently being reviewed. LCRBDC anticipates approval at upcoming Board meeting on November 10. COE requested a letter from LCRBDC regarding funding. The current schedule project advertisement on March 7, 2000, Award April 30, 2000, and construction start on May 30, 2000. The COE stated that it will participate in 53% of the cost. LCRBDC said that they are currently proceeding with the utility relocate agreements with NIPSCO and Marathon.

Stage VII and Stage VIII. A field review meeting and discussion are scheduled with the local sponsor on November 23 for Stage VII. LCRBDC requested any real estate information for this area (Corps coordinate points) in order to help with property identification - same for Stage VIII. SEH proposal for A/E services is three (3) times higher than the Government Estimate. Negotiations are ongoing. If unsuccessful RUST Engineering is second in line.

Regarding the standby pumping has been clarified that 3,500 gpm trailer mounted engine driven pumps will be furnished by the contractor at the Hchman-Munster and Baring Ave. pump stations. Notice to proceed for the Pump Sta. Rehab Project 1A is planned for January 2000. Our contract documents have to specify the standby pumping. Bharat Shah will coordinate this task.

Next discussed were the Local Sponsors concerns:

- Imad stated that he will submit a written acknowledgment that the LCRBDC will be credited $19,535 for the relocation of a water meter vault by the Town of Munster.
- Jim Flora will contact the Phillips Pipe Line Company and ask them to submit current cost estimate for directional drilling for pipeline relocation.
- It was agreed that antigraffiti will be used on all walls. Walls with graffiti will be sandblasted and will receive antigraffiti treatment. Aesthetic finishes will be used in areas of high exposure. Jim Pokrajac will follow up on costs. This expense should be part of the project cost.
- To report progress of utility coordination Jim Flora format will be followed.
- Stage V phase 2 will be divided into two separate parts. We concur with the Local Sponsor request. We will have to assess impact of it on real estate.
- Greg Moore discussed the Turf/Native Grass Issue. How do we maintain the native grasses. We want to burn them. Imad says that there may be problem with burning along I-80, there is concern for smoke, people are complaining. We can mow. Greg recommended to ask the specialized contractor, pay him for a day, walk the levee and ask him for advice.
- As for the comment regarding timely response to requests Imad assured that “We will never do it again”.
- There are numerous Gary Sanitary District issues. Their list is long. We will review notes from our previous meeting with the GSD and prepare a recommendation. Tom Deja is still working on the pump station checklist, and a write-up will be prepared, what we will do and what we will not do. Regarding other issues Imad said that a conference call will be arranged with Tom Deja to go over the outstanding issues. Question was raised why does it take so long the contractors to do the work. It was suggested to get Roy Deda (Chief of Construction Operations Division at the Chicago District) involved.

Imad Samara handed Dan Gardner a copy of the Customer Satisfaction form to be submit, kind of a evaluation of our performance. It has been recommended to prepare an agenda for a meeting to solve all other outstanding Gary Sanitary District issues. Jim Mazanec will have to get involved.
November 9, 1999 – Technical Review meeting
Local Sponsor Concerns

1. Town of Munster request for reimbursement
   • Imad stated that he will submit a written acknowledgement that the LCRBDC will be credited $19,535 for the relocation of a meter vault by the town of Munster

2. Phillips Pipe Line Company
   • The COE requested that Jim Flora will contact the Phillips Pipe Line Company to get a current cost estimate (existing estimate is 3 years old)
   • Flora asked again if the $20-25 thousand requested by Phillips to do a proper analysis would be creditable. Imad was not sure but he said to get them to do it anyway.
   • LCRBDC reiterated that the directional bore was critical because of safety concerns with potential pipeline rupture from a train derailment due to its proximity to the tracks.

3. Anti-graffiti and I-wall aesthetic finishes
   • It was agreed that all future contracts will include anti-graffiti finishes – Joe Schmidt said it will be for all walls, both sides.
   • Imad said that as part of the local sponsor acceptance of existing walls that the COE would be responsible for graffiti removal, but the local sponsor would be responsible for treatment of these segments.
   • LCRBDC will work with the COE to identify which future segments in the west reach will receive treatments for the aesthetic finishes.
   • Jim Pokrajac to get cost comparisons for the existing “FIN-TYPE” finish relative to the recently presented (October 29th) optional formliner surfaces.
   • Jim Pokrajac expressed interest by the Commission in using optional formliner surfaces to help the acquisition process. “We’re putting a concrete wall in people’s backyards”.
   • Imad suggested checking with communities about cost sharing the incremental cost differential.
   • Dan Gardner requested that the LCRBDC be involved in any of the processes with the Congressman to discuss including this change even if extra project money will be needed.

4. Tree preservation for Stage V Phase 2A
   • Jim Flora checked the existing, current set of plans for V-2 to see if the COE defined what trees would be saved, or removed, in the plans and specifications and found them incomplete.

5. Utility Coordination
   • The COE A/E will submit the initial format – He will identify each utility impacted, the location, and the initial status.
   • Jim Flora requested on using this format for the upcoming Stage VII and Stage VIII contracts.

6. Stage V Phase 2/Stage V Phase 3 Recreational pull out/Stage V Phase 2 Separation
   • Imad will send the LCRBDC a letter of concurrence to divide Stage V Phase 2 into 2 segments (Indpls to Northcote would be V-2A; Indpls to Kennedy would V-2B)
   • Imad also agreed to provide a letter (as per LCRBDC request of Sept. 16th) with cost and schedule information regarding the pullout of recreational features to tie in Hammond and Highland trails.
7. **Turf/Native grass issues**

- Greg Moore to provide written information regarding the best, and most acceptable, methods of maintaining native grasses and landscaping for future use in our O&M Manual.
- Greg Moore also agreed to respond (after a field inspection) to existing landscaping and check to see how much of it survived. That not surviving should be enhanced.
- Greg Moore said to check existing specification for the betterment levee to assure that the sub-contractor responsible for landscaping would have a period of time after planting to assure that the turf/landscaping establishes itself.

8. **West Reach standby pumping timely response to requests**

- LCRBDC noted that no specification for the type or size of the standby by pumping was included in the Phase 1 project. Bharat Shah will assure that this information will be provided to the contractor.
- Notice to proceed is scheduled for January 2000.
- LCRBDC wanted to be sure that the two (2) standby pumps provided as part of the contract will be sufficient to allow the contractor the flexibility to work on several stations at the same time, as well as for future west reach pump contracts.
- Jim Mazanec will check the FDM 6 to see how many pumps were to be provided.
- Jim Flora will check with the town of Munster about the status of the Baring pump station project.

9. **Timely response to requests**

- Imad said “We will never do it again”.

10. **Gary Sanitary District issues**

- It was suggested to get a committee together (Deja, Imad, Flora, Plachta, Pokrajac) to do a field review of ongoing issues regarding drainage and pump stations, prior to a meeting with the GSD.
- LCRBDC questioned why it was taking so long for the contractors to complete their projects (including pump station testing and turnover). The COE suggested the LCRBDC could have a meeting with Roy Deda to discuss this – it could also apply to all future contracts. (Also with the contracting officer)
- Jim Mazanec is to investigate the Gary “Swim Model” before we have a meeting with the GSD. He requested money from Imad to do this.
- Jim flora will coordinate an upcoming meeting with GSD, city of Gary, COE, and the LCRBDC to get final resolve on many ongoing, unanswered concerns (An agenda needs to be prepared).

DATE
Okay folks,

I received some comments from Jim Pokrajac, and have included them below in a different typeface. If any of you has any other remarks, please send them by the close of business tomorrow (Wed.) If I don't hear from you by then, I will assume that you're satisfied, clean up these varying typefaces and colors, and will send this officially to Earth-Tech.

Melcy Pond of Earth-Tech also contacted me this afternoon, and will be sending her version of these meeting minutes. I will also add this information to these minutes as well.

Thanks.

Tim Kroll

LITTLE CALUMET RIVER, INDIANA
STAGE VII LOCAL FLOOD PROTECTION and RECREATION PROJECT
A/E CONTRACT AGREEMENT (DACW23-99-C-0054)
for DESIGN SERVICES by EARTH-TECH
PRE-DESIGN CONFERENCE AGENDA

GENERAL DESIGN FEATURES
1. Floodwalls:

Form liner revision from type indicated on SOW, p. 3, para. 3.b.

The COE SOW states that Earth-Tech shall include facing on floodwalls similar to that already used in Stages III and V of the Little Cal Improvements. However, the LCRBDC would like to have a flagstone or cobble stone appearance to the floodwall facing for all landslide walls and perhaps where appropriate on riverside. It was agreed that a decision relating to the type of facing desired would be made and provided to Earth-Tech by the Mid Design Conference. Specific items to be determined by that time include locations where new liners shall be used (as noted, all landslide areas, but also some to-be-determined riverside areas as well), and whether or not the Local Sponsor will purchase these or will the liners be purchased within the Construction contract.

The COE requested that anti-graffiti measures be included in the design of all floodwalls (referenced was made to spray on or similar application type products).
Stage IV-South structural drawings will also be provided; see documentation table below, item #3.

2. Recreation Features:

none, except Recreation trail.

It was noted that local Boy Scout troops have made improvements within the project area in the last year. They are aware of the pending project. Their improvements have included plantings and fencing. The locations of the improvements should be noted by Earth-Tech, and language will be included in the contract documents to salvage their work, or replace in kind where possible. The handrails located on top the north-side embankment currently will not be replaced.

Standard signage drawings will be provided for the use of the A/E by COE; see documentation table below, item #6.

3. Borrow Site:

Verify A/E understanding of requirements.

The COE explained that the contract will be set up to specify that the contractor will have two options concerning fill material: furnish approved material from offsite locations, or utilize material from the furnished borrow site. The COE has provided borrow site drawings for the A/E to complete for the Stage VII contract. The plans will show haul routes, restrictions and the locations of the borrow materials to be accessed for the project. It was noted that other contract Stage work may alter the borrow site after the plans have been prepared by Earth-Tech. The COE acknowledged that they will need to make modifications to the borrow site plans prior to advertisement, if this event should happen.

4. Planting Zones:

Verify A/E understanding of requirements.

Excess Stage VII project site material should be used for this work. If this amount is insufficient, the material stockpiled at 35th and Chase Street could also be used for overburden.

Stage VI project drawings showing the planting zones will be provided for A/E use; see documentation table below, item #7.

The COE advised Earth-Tech to feel free to suggest planting schemes and materials different than the “cookie cutter” patterns suggested in the initial plans. The LCRBDC stated that the landscaping for these areas should reflect the appearance and value of the adjacent neighborhood areas. The type of landscaping included will have a large effect on the support for this project from the local adjacent property owners.

The LCRBDC also requested that a performance specification for the landscaping is included within the project specification. This approach is needed to guarantee the long-term viability of the trees and plantings. Other recent Little Calumet River River project stages have had problems with new vegetation dying shortly after completion of the project, and this difficulty needs to be addressed.
5. Field work:

Earth-Tech will be required to verify the locations of all utilities, and other site features (fences, structures, etc.) The actual field survey of the utility locations is NOT a responsibility of the COE.

Project coordinates are not the same as Indiana State Plane coordinates (which are not to be used for this project). Horizontal and vertical control points are benchmarks only.

The LCRBDC has concerns regarding the accuracy of the real estate property line information included with the information previously submitted to the A/E. This data is not very accurate; it was assembled by digitizing Sidwell property maps of the area, and approximating the placement of this data onto the topo. Given the tight access along the south side of the project especially, greater accuracy at the beginning of the project is necessary. The LCRBDC recommends that Earth-Tech redevelop these property lines, based upon Sidwell property map data, and new survey points that the LCRBDC will obtain. The Corps will coordinate with LCRBDC to provide a drawing showing the data points necessary to complete this work, and will also provide horizontal control points with known Little Calumet Project coordinates.

This task needs to be completed as soon as possible, as Earth-Tech cannot perform much of their work until this real estate survey data is provided. The COE provided the survey requirements to the LCRBDC on November 30th.

6. Subsurface Investigation:

Weather permitting, recommend initiating this work as soon as possible after receipt of Notice to Proceed.

The SOW is vague with regard to whom shall obtain rights-of-entry for this work. It was agreed that any contact with property owners would be made through Judy Vamos. Earth-Tech will provide the locations necessary for the soil borings to the COE (see documentation table below, items #16 and #5), and the COE will coordinate obtaining the rights-of-entry for this work. Judy emphasized that the property owners must be identified from property title information to avoid errors. When the right-of entry to the properties is obtained for this work, the official Notice-to-Proceed will be issued at the same time.

QUALITY CONTROL

7. Quality Control Plan (QCP)

SOW, p. 6, para. 5.a. requires submittal of two copies of the A/E’s QCP to LRC prior to initiating work. See also schedule below.

Earth-Tech shall submit this document as soon as possible after the N-T-P has been issued. COE recommends inclusion of product development team, ITR team, schedule, and method for resolving conflicting review comments.

COORDINATION

8. Public Meetings
Coordinate the selected dates with the Local Sponsor. Estimated dates appear on Schedule on following page.

Separate public meetings shall be conducted for the City of Hammond, and the Town of Munster. The first public meeting with each shall be a work study session with municipal personnel only, for information/coordination purposes. The second public meeting with each entity will be for the benefit of the general public. The two initial public meetings with the municipalities have been tentatively scheduled to take place during the second week of January. See also the proposed project Schedule. The Local Sponsor has requested that five sets of the FDM 5 plan view plates and cross-sections for the river’s north side line-of-protection be provided to the City of Hammond for their review. Similarly, five sets of the same information pertaining to the river’s south side line-of-protection need to be provided to the Town of Munster. See also the documentation table below, items #13 and #14.

9. Utility Coordination and Relocation

Summary of process:
A. Field location/verification of all utilities, and identify conflicts.
B. A/E submits project conflict information to each utility, and well as criteria for relocation thereof.
C. Utility will develop plan to relocate, as well as cost.
D. A/E coordinates with utility until acceptable plan is submitted and approved.
E. This plan is submitted to Local Sponsor and Corps for Quality Assurance purposes.
F. Local Sponsor will draft agreement with utility.

NOTE: The Local Sponsor and the COE (Imad Samara) should be invited to all meetings conducted with utility companies, and copy furnished all documentation.

The COE will not be involved in the utility negotiation process unless a deadlock arises.

The development of a monthly summary of these activities by Earth-Tech is included in the SOW.

SCHEDULE

10. Proposed project schedule based upon a Nov. 23, 1999 Notice-to-Proceed:

All dates shown below after the two initial Public Meetings will be adjusted, based upon the actual date of the issuance of the Notice-to-Proceed. Refer to Agenda Item #5 for discussion of this issue.

??? - Submittal of A/E QCP
23 NOV 99 - Pre-Design Conference
?? JAN 00 - Municipal (public) Meeting with Hammond, IN
?? JAN 00 - Municipal (public) Meeting with Munster, IN
06 MAR 00 - Mid-Design Conference
09 MAR 00 - Public Meeting
24 MAY 00 - Initial Submittal
19 JUL 00 - Gov't. review comments completed
30 AUG 00 - Public (general) Meeting with Hammond, IN
30 AUG 00 - Public (general) Meeting with Munster, IN
07 SEP 00 - Pre-Final Submittal
02 NOV 00 - Gov't review comments completed
24 NOV 00 - Final Submittal

REAL ESTATE

11. Drawing Requirements:

Tract Numbering methodology

MISCELLANEOUS

12. Requested Aerial Photos:

Current aerial photos were completed 01 Dec 94. Contract for new photos (and possibly topography) is being negotiated currently. Expected receipt of new aerial photos is late Dec 1999. Earth-Tech agreed to await receipt of the new photos. The LCRBDC also wants a (full project) set of aerials. See documentation table below, items #8 and #12.

13. BCOE Comments and responses may be submitted via Email.

May have to coordinate with Earth-Tech office in Loop (3rd Flr) to send documents back and forth via Email. Daily Earth-Tech inter-office mail between the Loop and Oak Brook locations is also available for sending documents.

14. Eng. Form 93 (Payment) may be submitted directly to Tim Kroll.

15. Cost Engineering work

Earth-Tech has the version of MCACES for CAD, and requests a copy of MCACES for Windows (MFW), version 1.2, which is the version preferred by ED-C.

16. Miscellaneous

Construction plans will be prepared by Earth-Tech for the sand bag closure structure for Northcote Avenue. Examples previously prepared will be provided to Earth-Tech. See documentation table below, item 4. In addition, the COE requested that Earth-Tech identify a possible means of providing for material storage near to the locations where the sand bag closure structures will be used.

Earth-Tech noted during the field inspection trip that the placement of the I-Wall around the Walnut Street Pump Station would be difficult to construct due to space limitations. Likewise, the placement of the steel pile wall adjacent to the residential homes on the southside of the river will be extremely difficult. Other alternatives must be investigated.

DOCUMENTS/DRAWINGS/ITEMS to be transmitted:
To Earth-Tech: By Whom:

1. Notice-to-Proceed (NTP) Corps Will be provided as soon as Item #5 is completed.

2. Survey points to assist in accurate property boundary depiction LCRBDC will be provided as soon as it is available.

3. Little Cal River, Stage IV-1 South Corps project structural drawings. (These are a much better example of our current structural drawing format than the East Reach Remediation drawings previously provided.)

4. Little Calumet River, Stage V-3 project Corps Details of Sandbag Closure Structure at Woodmar.

5. Rights-of-Entry for Soil Boring work Corps Will be provided after receipt of Item #16.

6. Little Calumet River, various projects Corps Recreation signs drawings and details

7. Little Calumet River, Stage VI Corps Planting zones sample drawings/details

8. Updated Aerial Photos of project area Corps Will be provided as soon as they are available. Expected late Dec. 99.

9. Walnut Street Pumpstation project drawings Corps Drawings will be avail. Discharge Box structure information approx. 06 Dec 99, and for A/E coordination transmitted thereafter.

To LCRBDC: By Whom:

10. selected points for survey (and control points) to be used to more accurately define property boundaries Corps info submitted on 01 Dec 99.

11. copy of Notice-to-Proceed (NTP) Corps Will be provided as soon as Item #5 is completed.

12. Updated Aerial Photos, full set for all of Little Calumet River project Corps Will be provided as soon as they
are available.
Expected
late Dec. 99.
13. Five sets of FDM 5 plan view plates and Corps
   cross-sections, north side of River for meeting with City of Hammond.
14. Five sets of FDM 5 plan view plates and Corps
   cross-sections, south side of River for meeting with Town of Munster.

To Corps: By Whom:

15. Quality Control Plan (QCP) Earth-Tech
16. Approximate Soil Boring Locations Earth-Tech
   (necessary to obtain Rights-of-Entry)
17. Schedule of key project dates, similar Earth-Tech This item is
   to version shown in Agenda Item #10 contingent on
   above. receipt of the

NTP: Item #1

I have revised the minutes in accordance with your comments. Part of the FAX copy was hard to read, so please review and let me know if any changes are needed.

Thanks;

Jan

Little Calumet River Flood Control Project status review meeting was held on Tuesday, November 9, 1999, at 9:00 a.m. at the Engineering Division Conference Room. Attendees at the meeting were:

- Dan Gardner, LCRBDC
- Jim Pokrajac, LCRBDC
- Jim Flora, Consultant - LCRBDC
- Imad Samara, PP-PM
- Joe Schmidt, ED-D
- Jim Mazanec, ED-HH
- Leslie Bush, ED-G
- Emmett Clancy, RE-A
- Greg Moore, PD-S
- Huma Nisar, ED-DC
- Jan Plachta, PP-PM
- Eric Sampson, ED-DS
- Bharat Shah, ED-DG

Imad Samara, the Project Manager discussed status of Stage IV, Phase 1, North and South Projects. Discussed were bid opening results of the IV-1, North. Apparent low bidder is Dillon Contractors, Inc. from Frankford, IN. His bid was $2,708,720, almost $700,000 below the Government Estimate Without Profit. The second low bidder was Rausch Construction Co. with bid of $3,996, 520. Before award preaward survey will be taken. Bonding takes about 10 days. Plans and Specifications for IV-1, South are under review right now. Comments are expected by November 16th. Review comments will be incorporated by December 2nd. CBG announcement will be ready by December 9th and the project advertisement is expected by December 30th. Bob Behms is out in field today for survey of INDOT power poles with transformers that were placed within our levee limits in vicinity of I-80, Black Oak Road and EJ&E railroad. Of concerns are the railroad issues.

Everybody was cooperative on the Pump Stations 1A project. Pittsburgh District is presently incorporating review comments. Advertisement is scheduled for November 30th. Project VI-2 is doing OK., review comments are needed ASAP. Rani Engineering, 8a Set Aside will do engineering on VI-2. Jim Pokrajac requested that the COE contact Cole Associates to clarify uncleared lines on their survey request. All other coordinates have been completed for over 2 weeks. VI-2 has recreational feature tying to Griffith levee. Jim Pokrajac stated that he mailed a letter to Imad indicating that the Griffith levee alignment (as installed) is 18 feet north of the centerline of our levee. There are no real estate changes to levee at VI-1. This design is important because of potential delay if we don’t get the real estate. Civil and Tech Support has lead on VI-1. We will have to decide what to do with Stage VIII. The Short Elliott Hendrickson Inc. proposal is three times higher than the Government Estimate. Should there be no revision to the bid price we will go with Earth Tech. Paul Mohrhardt has the lead. Jim Pokrajac said that the appraisal of WIND property will be hopefully ready next week. He also mentioned that NIPSCO and Ameritech have completed their proposal for utility relocation to service the WIND facility and
this will be forwarded to the COE for their review and comments. INDOT installed power poles with transformers at the center line of our levee. Letter has been mailed to INDOT asking for timely relocation of these poles before start of construction in spring of 2000.

IV-1 South is currently being reviewed locally and the Corps is scheduled to advertise this on December 30.

Mitigation Contract. LCRBDC said that they would be available for a conference call with the COE and Conservation Design Forum, Inc., on November 15th.

Burr Street, Phase 1. The MOA has been completed and is currently being reviewed. LCRBDC anticipates approval at upcoming Board meeting on November 10. COE requested a letter from LCRBDC regarding funding. The current schedule project advertisement on March 7, 2000, Award April 30, 2000, and construction start on May 30, 2000. The COE stated that it will participate in 53% of the cost. LCRBDC said that they are currently proceeding with the utility relocate agreements with NIPSCO and Marathon.

Stage VII and Stage VIII. A field review meeting and discussion are scheduled with the local sponsor on November 23 for Stage VII. LCRBDC requested any real estate information for this area (Corps coordinate points) in order to help with property identification - same for Stage VIII. SEH proposal for A/E services is three (3) times higher than the Government Estimate. Negotiations are ongoing. If unsuccessful RUST Engineering is second in line.

Regarding the standby pumping has been clarified that 3,500 gpm trailer mounted engine driven pumps will be furnished by the contractor at the Hohman-Munster and Baring Ave. pump stations. Notice to proceed for the Pump Sta. Rehab Project 1A is planned for January 2000. Our contract documents will have to specify the standby pumping. Bharat Shah will coordinate this task.

Next discussed were the Local Sponsors concerns:

- Imaed stated that he will submit a written acknowledgment that the LCRBDC will be credited $19,535 for the relocations of a water meter vault by the Town of Munster.
- Jim Flora will contact the Phillips Pipe Line Company and ask them to submit current cost estimate for directional drilling for pipeline relocation.
- It was agreed that antigraffiti will be used on all walls. Walls with graffiti will be sandblasted and will receive antigraffiti treatment. Aesthetic finishes will be used in areas of high exposure. Jim Pokrajac will follow up on costs. This expense should be part of the project cost.
- To report progress of utility coordination Jim Flora format will be followed.
- Stage V phase 2 will be divided into two separate parts. We concur with the Local Sponsor request. We will have to assess impact of it on real estate.
- Greg Moore discussed the Turf/Native Grass Issue. How do we maintain the native grasses. We want to burn them. Imaed says that there may be problem with burning along I-80, there is concern for smoke, people are complaining. We can mow. Greg recommended to ask the specialized contractor, pay him for a day, walk the levee and ask him for advice.
- As for the comment regarding timely response to requests Imaed assured that "We will never do it again".
- There are numerous Gary Sanitary District issues. Their list is long. We will review notes from our previous meeting with the GSD and prepare a recommendation. Tom Deja is still working on the pump station checklist, and a write-up will be prepared, what we will do and what we will not do. Regarding other issues Imaed said that a conference call will be arranged with Tom Deja to go over the outstanding issues. Question was raised why does it take so long the contractors to do the work. It was suggested to get Roy Deda (Chief of Construction Operations Division at the Chicago District) involved.

Imaad Samara handed Dan Gardner a copy of the Customer Satisfaction form to be submit, kind of an evaluation of our performance. It has been recommended to prepare an agenda for a meeting to solve all other outstanding Gary Sanitary District issues. Jim Mazanec will have to get involved.
November 9, 1999 – Technical Review meeting  
Local Sponsor Concerns  

1. Town of Munster request for reimbursement  
   • Imad stated that he will submit a written acknowledgement that the LCRBDC will be credited $19,535 for the relocation of a meter vault by the town of Munster  

2. Phillips Pipe Line Company  
   • The COE requested that Jim Flora will contact the Phillips Pipe Line Company to get a current cost estimate (existing estimate is 3 years old)  
   • Flora asked again if the $20-25 thousand requested by Phillips to do a proper analysis would be creditable. Imad was not sure but he said to get them to do it anyway.  
   • LCRBDC reiterated that the directional bore was critical because of safety concerns with potential pipeline rupture from a train derailment due to its proximity to the tracks.  

3. Anti-graffiti and I-wall aesthetic finishes  
   • It was agreed that all future contracts will include anti-graffiti finishes – Joe Schmidt said it will be for all walls, both sides.  
   • Imad said that as part of the local sponsor acceptance of existing walls that the COE would be responsible for graffiti removal, but the local sponsor would be responsible for treatment of these segments.  
   • LCRBDC will work with the COE to identify which future segments in the west reach will receive treatments for the aesthetic finishes.  
   • Jim Pokrajac to get cost comparisons for the existing “FIN-TYPE” finish relative to the recently presented (October 29th) optional formliner surfaces.  
   • Jim Pokrajac expressed interest by the Commission in using optional formliner surfaces to help the acquisition process. “We’re putting a concrete wall in people’s backyards”.  
   • Imad suggested checking with communities about cost sharing the incremental cost differential.  
   • Dan Gardner requested that the LCRBDC be involved in any of the processes with the Congressmen to discuss including this change even if extra project money will be needed.  

4. Tree preservation for Stage V Phase 2A  
   • Jim Flora checked the existing, current set of plans for V-2 to see if the COE defined what trees would be saved, or removed, in the plans and specifications and found them incomplete.  

5. Utility Coordination  
   • The COE A/E will submit the initial format – He will identify each utility impacted, the location, and the initial status.  
   • Jim Flora requested on using this format for the upcoming Stage VII and Stage VIII contracts.  

6. Stage V Phase 2/Stage V Phase 3 Recreational pull out/Stage V Phase 2 Separation  
   • Imad will send the LCRBDC a letter of concurrence to divide Stage V Phase 2 into 2 segments (Indpls to Northcote would be V-2A; Indpls to Kennedy would V-2B)  
   • Imad also agreed to provide a letter (as per LCRBDC request of Sept. 16th) with cost and schedule information regarding the pullout of recreational features to tie in Hammond and Highland trails.
7. **Turf/Native grass issues**
   - Greg Moore to provide written information regarding the best, and most acceptable, methods of maintaining native grasses and landscaping for future use in our O&M Manual.
   - Greg Moore also agreed to respond (after a field inspection) to existing landscaping and check to see how much of it survived. That not surviving should be enhanced.
   - Greg Moore said to check existing specification for the betterment levee to assure that the sub-contractor responsible for landscaping would have a period of time after planting to assure that the turf/landscaping establishes itself.

8. **West Reach standby pumping timely response to requests**
   - LCRBDC noted that no specification for the type or size of the standby by pumping was included in the Phase 1 project. Bharat Shah will assure that this information will be provided to the contractor.
   - Notice to proceed is scheduled for January 2000.
   - LCRBDC wanted to be sure that the two (2) standby pumps provided as part of the contract will be sufficient to allow the contractor the flexibility to work on several stations at the same time, as well as for future west reach pump contracts.
   - Jim Mazanec will check the FDM 6 to see how many pumps were to be provided.
   - Jim Flora will check with the town of Munster about the status of the Baring pump station project.

9. **Timely response to requests**
   - Imad said “We will never do it again”.

10. **Gary Sanitary District issues**
    - It was suggested to get a committee together (Deja, Imad, Flora, Plachta, Pokrajac) to do a field review of ongoing issues regarding drainage and pump stations, prior to a meeting with the GSD.
    - LCRBDC questioned why it was taking so long for the contractors to complete their projects (including pump station testing and turnover). The COE suggested the LCRBDC could have a meeting with Roy Deda to discuss this – it could also apply to all future contracts. (Also with the contracting officer)
    - Jim Mazanec is to investigate the Gary “Swim Model” before we have a meeting with the GSD. He requested money from Imad to do this.
    - Jim flora will coordinate an upcoming meeting with GSD, city of Gary, COE, and the LCRBDC to get final resolve on many ongoing, unanswered concerns (An agenda needs to be prepared).

**COMMENTS:**
PP-PM/ED-D responding to BCOE comments.
EJ&E and Norfolk Southern Railroad meeting, regarding construction issues on the Little Calumet River Flood Control Project, Stage IV, Phase 1, South, was held on November 9, 1999 at the Chicago District USACE, Main Conference Room. Attendees at the meeting were:

Mark Paul EJ&E Railroad
Rick Mays EJ&E Railroad
David Orrison Norfolk Southern Railroad
Jim Pokrajac LCRBDC
Imad Samara PP-PM
Leslie Bush ED-G
Emmett Clancy RE-A
Huma Nisar ED-DC
Piacha Jan PP-PM
Eric Sampson ED-DS
Bill White RO

Mark Paul raised a question regarding tying down of the 10 feet long precast concrete crossing panels and recommended use of longer ties for anchoring and support of the panels. Where our levee crosses the two tracks, at station 16+00, (EJ&E property), one of them is being used by EJ&E and the second one is being leased from EJ&E by Norfolk Southern. EJ&E will do the work. The railroad ties could be moved for the steel sheet pile driving. A panel with rails and ties will be prepared by the railroad before begin of construction work. The steel sheet piles will be driven when the track will be available, no traffic. The proper time frame would be provided by the railroad. Railroads representatives will be invited to the preconstruction meeting.

David Orrison inquired about elevation of the rails at the Norfolk Southern crossing. NS RR needs a minimum of 18" between the bottom of the ties and the top of the steel sheet pile wall. A shallow trench will be excavated through the embankment, sheetpiles will be driven. After piles are driven the trench will be backfilled and track replaced. A note will be provided in the drawing and in the specifications.

Of critical importance are the real estate issues. Project advertisement is scheduled for December 30th 1999. We will have to have an agreement signed for the right of entry. We are asking for construction and levee easements, two separate agreements. EJ&E needs a Board action to secure agreement. Very short time to get this done. Mark Paul stated that if we will have the needed documentation by the end of this week than there is a chance that the EJ&E Board could approve it by the middle of December 1999. Practically this looks almost impossible. Bid opening is scheduled for end of January 2000, project award is scheduled for middle of February and begin of construction in April 2000. For Norfolk and Southern the needed agreement needs signature of Vice President of Engineering. His office is based in Atlanta and he could sign quickly. David Orrison stated that he will provide us with a marked up agreement by the end of this week. Wording is of critical importance.
Railroads purchase and installs the closure panel. The Corps contractor will just drive the piles. Both railroads said that, with the exception of sheet piling, their union personnel would do all work on all of the railroad right of ways. Dave Orrison said that he will have a sample of a copy of construction agreement for Jim Pokrajac. Shortly discussed were also issues with the recreational trails at railroad crossings. Lou Casale has done some work on this crossings.

David Orrison discussed next his review comments on the Stage IV-1, South. Hard copy of this comments will be mailed to us shortly. He was concerned about work progress in the area east of Colfax Ave. In this reach the floodwall on the north side of the river will be placed between the railroad embankment and the waters edge, severely restricting the work limits. Temporary placement of fill will be used on the river side of the wall to create a 30 feet wide work zone for construction equipment. David Orrison would like us to monitor the embankment for settlement at least once a week during construction and once a month afterwards.

Both railroads will put together costs that will be incorporated into agreements to be facilitated by the Local Sponsor.

The railroads suggested that in any areas of construction where more than one set of tracks exist that only one set will be worked on at a time.

The COE requested that both agreements could be put in place by Dec. 15th. Rick Moys (EJ&E) stated that with the upcoming holidays and other railroads priorities, as well as their Board only meeting once a month it would be a slow process.
On the Trail in Northwest Indiana

The Northwestern Indiana Regional Planning Commission, in cooperation with John Davies of the Northwest Indiana Forum, is developing a year long series of television programs called On the Trail in Northwest Indiana. The series highlights significant public projects in Northwest Indiana and NIRPC's role in their development.

December's program features Dan Gardner, Little Calumet River Basin Commission's Executive Director, and Lake Co. Parks and Recreation Superintendent Bob Nickovich discussing plans for recreation trail development along the Little Calumet River linking six parks along the corridor. Featured is Lake Etta Park in Gary.

The series has previously featured lakefront marina development in Michigan City, trail development in Valparaiso, development of a youth golf course in Hammond and plans for the redevelopment of the lakeshore near Buffington Harbor in Gary.

On the Trail in Northwest Indiana will be aired on the following Northwest Indiana cable television stations between December 8th and 14th at these times (subject to change):

On the Trail in Northwest Indiana is also broadcast on PBS (WYIN) Channel 56 on the third and fourth Sunday of the month at 7:00 a.m.
RESULTS OF 30 NOVEMBER 1999 REAL ESTATE MEETING

LITTLE CALUMET RIVER FLOOD PROJECT / ARMY CORPS OF ENGINEERS

In attendance: LCRBDC:  COE:
  Dan Gardner  Imad Samara
  Lou Casale  Bill White
  Sandy Mordus  Emmett Clancy
  Jim Pokrajac  Chris Borton
  Angie Ogrentz
  Judy Vamos

1. STAGE IV-1 NORTH
   a. Status of DC 546 (owner Alger Sumar) - Angie reported that the court-appointed appraisers (for the condemnation) are currently appraising the property. They'll submit their appraisals in a few weeks and the court will then make its decision. This is the last remaining private landowner in this stage.
   Acquisition is crucial.
   (ACTION: Lou/LCRBDC)

2. STAGE IV-1 SOUTH
   a. Status of the WIND (DC 59) appraisal - Judy reported that the appraisal is complete and approved. After today's meeting Judy will give Angie all necessary information to mail the Uniform Land Offer as quickly as possible. Acquisition is crucial.
   (ACTION: Judy and Lou/LCRBDC)

   c. Status of railroad offers - Lou reported that all the railroad offers for Stage IV-1 and the Burr Street Betterment Levee were sent at the same time. The railroads are reviewing. Jim reported a problem with the E. J. & E. ownership of a 70 ft. strip. E.J. & E. sold the strip to INDOT, but INDOT did not record the sale. Judy will have the appraisal amended, Chris will review the amendment, Angie will send a new offer to INDOT and a revised offer to the railroad. Lou is in contact with the railroads.
   (ACTION: Chris/ COE and Judy, Angie/LCRBDC)

   c. Status of INDOT properties for staging area - The INDOT staging area is an area INDOT is using for their own mitigation. Imad reported that he has notified the Detroit permitting office which has given approval to go ahead and use the area. Imad needs to send a letter to INDOT stating that INDOT is not out-of-compliance with their mitigation requirements. Imad will fax the letter to Sandy and she will include it in the agreements that are ready to be mailed to INDOT.
   (ACTION: Imad/COE and Sandy/LCRBDC)

   d. Status of DC 448 (the garage problem of owners David and Karen Taborski) - The problem of relocating the Taborski’s garage is ongoing. Jim has drafted a letter for the Taborskis to sign that stipulates what the LCRBDC will furnish to them. He has given copies to Imad, Lou, and Judy to review. A final will be sent to Taborskis. LCRBDC needs a letter from Imad stating that the cost for garage relocation, concrete work, moving their personal possessions will be creditable.
   (ACTION: Imad/COE and Lou, Judy/LCRBDC)

   c. A new problem with the erection of a NIPSCO utility line in the levee line near the Cline Avenue Interchange. LCRBDC has submitted the easement agreements to INDOT but INDOT has not signed, therefore, INDOT still has control of the property. COE will pursue removal of the line and LCRBDC will pursue the agreement signing.
   (ACTION: COE and LCRBDC)

3. Woodmar Country Club
   a. Status of Woodmar appraisal - Judy reported that Dale has submitted a fee for the Woodmar Country Club appraisal of $12,000 to $15,000. Judy and Lou will get him the contract. He can start the appraisal when final surveys on Woodmar received from Cole & Associates.
   (ACTION: COE and LCRBDC)
4. STAGE V-2 (Wicker Park Golf Course and private landowners)
   a. Owner Identification - Jim reported that Cole & Associates is doing property identification of all properties in the West Reach.

   b. Appraisal for Wicker Park Golf Course? - Discussion held that acquisition here is same as V-3 (deadline December of 2000). Agreed by Chris and Judy to contact John Snell, well-known golf course appraiser in Indianapolis to commit to this appraisal. (ACTION: Judy/LCRBDC)

   c. Status of dividing the contract into two segments - It was agreed to split V-2 into two segments:
      Stage V-2 A will be Indianapolis Blvd. west to Northcote
      Stage V-2 B Indianapolis Blvd. east to Kennedy
      Imad has sent letter to LCRBDC stating approval.

   d. Tri-state Coach Lines problem - Jim reported that a new problem could arise with Tri-State. COE drawings show the easement requirements taking 100 ± parking spaces. Something to think about as scheduling becomes more aggressive.

5. STAGE VI
   a. COE expects to deliver real estate drawings on or before 6 January 2000. (ACTION: COE)

   b. COE is anticipating to start the hotel/motel acquisitions. Chris suggested contracting Dale Kleszynski's associate David DuBois for the assignment. Judy will contact Mr. DuBois. She also cautioned COE to be mindful of the funding issues facing LCRBDC. By adding the three motels to the Woodmar Country Club, Wicker Park Golf Course, and a workload of 120 current properties the LCRBDC could be in funding crisis. Land acquisition costs alone could be in the multi-millions. (ACTION: Chris/COE and Judy/LCRBDC)

6. BURR STREET- PHASE I
   a. Remaining acquisitions - Judy reported that there are two remaining acquisitions:
      DC 603 - landowner wants two existing trees left undisturbed. LCRBDC waiting for COE response to Judy's letter.
      DC - landowner (Mansards Apartments) has letter from LCRBDC offering a fence next to the playground area which borders the ditch. LCRBDC waiting for response from landowner. (ACTION: COE and LCRBDC)

   b. Status of railroad easements - Lou reported that the railroad easement agreements were sent with the railroad agreements for Stage IV-1. Railroads are reviewing the engineering.

7. BURR STREET - PHASE II
   a. Discussion on the target date of all the remaining properties in Burr Street Betterment Levee area. LCRBDC feels April 2000 too aggressive for acquisition of 10 remaining properties which include 3 relocations and 3 possible condemnations, however, COE needs to award their contracts. It was agreed to work toward the April 2000 date but perhaps add a few months extension as we get closer and see how acquisitions are proceeding. Bill White suggested adding incentives to appraisers to complete assignments in less time.
8. EAST REACH REMEDIATION (ERR)
   a. COE headquarters has revised a previous decision and will now give project credit for the $500,000+ land costs for the flowage properties in the East Reach Remediation area. Bill reported that Congressman Visclosky was not able to include special wording in this year's WRDA legislation but HQ considered the intent to do it and will allow crediting. Crediting is based on land acquisition costs starting with the appraisal for fair market value of properties. Judy will forward appraisals to Chris for his review.
   (ACTION: Judy/LCRBDC)

9. CREDITING
   a. Emmett reported that the new tracking program is a work in progress and a prototype is expected in about 60 days.
   (ACTION: Emmett/COE)

10. PUMP STATIONS - PHASE I
    a. Authorization for Entry for Construction - Dan reported that he has spoken with INDOT's attorney and there is no problem with INDOT signing the agreements. Sandy has the agreements for Munster, Hammond, and North Township ready for mailing. The easement language is acceptable according to Emmett.
    (ACTION: Sandy/COE)

11. MITIGATION
    a. & b. COE needs R/E for soil borings on the LCRBDC two large tracts needed for in-project mitigation requirements:

       1.) 29th and Hanley Street in Gary - 19 acres - Sankstone Enterprises DC 616. Judy reported that as of today the owner can't be located and the property is on a tax sale. It was discussed and agreed to make another effort to find owner but then pursue tax sale acquisition.

       2.) Cline and Liable Road in Highland - 58 acres - Lucy Davis Trust DC 617. Judy reported that title work has just been received. The introduction letter will be sent.

    Both landowners will first be sent an introduction letter. The request for a R/E for soil borings will follow about a week later.

    b. COE Requests the Status of the 179 acres - Could this be made available for mitigation purposes and reduce the need for lands in the Hobart Marsh Area? Dan reported that the 179 acres is not available. When COE rejected LCRBDC lands as not feasible for mitigation purposes LCRBDC proceeded with other plans. LCRBDC currently has an option on the land with Lake Erie Land Company to do mitigation restoration.

    C. Jim requested legal drawings for the in-house mitigation tracts.

12. NEXT MEETING
    Tuesday, 21 December 1999, 9:30 am at COE office in Chicago.
